Former investment advisor turned committed Buddhist shares a simple introduction to the deep wisdom and transformative practice of mindfulness. Everyone is talking about mindfulness, but how does it actually work and how can it help you? Mindfulness is a simple yet radical practice that can completely transform your life. Paddy Brosnan worked for many years as an investment advisor but felt trapped in a cycle of anxiety and anger. When he began practising mindfulness every day, he found that his relationships became more profound, his interactions with others more honest and his daily frustrations and anxieties simply vanished. In other words, mindfulness helped him calm down, and he became truly happy. This Works is the collection of tools and exercises that Paddy teaches in his workshops and events, and includes examples of everyday mindfulness from his own family life. It shows you that literally anyone can learn to meditate, and you don't have to become a Buddhist monk to be truly zen. Through simple daily exercises, you'll learn that mindfulness is not something you do, but something you are. Or, put simply, mindfulness can help you be truly happy. This book is a study of the weaving and unweaving of particular subject positions within James Joyce's major works - Dubliners, A Portrait of the Artist as a Young man, Ulysses, and Finnegans Wake - through representations of voice, which negotiates identity, authority, and subjectivity. The voice, in the narrowest sense, reveals itself as a portion of the narrative which in turn stands as part of the discourse of a particular work. This work explores the different ways that Joyce portrays and negotiates identity through voice and the conceptualization of boundaries that exist in between different and distinct subjectivities, which are explored by the author of this work from within the conceptualization and representation of voice. This book is a celebration of Leslie Lamport's work on concurrency, interwoven in four-and-a-half decades of an evolving industry: from the introduction of the first personal computer to an era when parallel and distributed multiprocessors are abundant. His works lay formal foundations for concurrent computations executed by interconnected computers. Some of the algorithms have become standard engineering practice for fault tolerant distributed computing – distributed systems that continue to function correctly despite failures of individual components. He also developed a substantial body of work on the formal specification and verification of concurrent systems, and has contributed to the development of automated tools applying these methods. Part I consists of technical chapters of the book and a biography. The technical chapters of this book present a retrospective on Lamport's original ideas from experts in the field. Through this lens, it portrays their long-lasting impact. The chapters cover timeless notions Lamport introduced: the Bakery algorithm, atomic shared registers and sequential consistency; causality and logical time; Byzantine Agreement; state machine replication and Paxos; temporal logic of actions (TLA). The professional biography tells of Lamport's career, providing the context in which his work arose and broke new grounds, and discusses LaTeX – perhaps Lamport's most influential contribution outside the field of concurrency. This chapter gives a voice to the people behind the achievements, notably Lamport himself, and additionally the colleagues around him, who inspired, collaborated, and helped him drive worldwide impact. Part II consists of a selection of Leslie Lamport's most influential papers. This book touches on a lifetime of contributions by Leslie Lamport to the field of concurrency and on the extensive influence he had on people working in the field. It will be of value to historians of science, and to researchers and students who work in the area of concurrency and who are interested to read about the work of one of the most influential researchers in this field. By Jerome Rothenberg. Contributions by Steven Clay. The 26th volume in a 29-volume set which contain all Charles Darwin's published works. Darwin was one of the most influential figures of the 19th century. His work remains a central subject of study in the history of ideas, the history of science, zoology, botany, geology and evolution. This fourth volume contains two treatises of biblical exposition. The first treatise is A Godly and Learned Exposition upon the Whole Epistle of Jude . Finding the purpose of Jude's letter in verse 3, Perkins calls for all Christians to persevere in professing the gospel by taking heed of false teachers and deceivers, who seek to infiltrate the church. While many of his points of application reflect a context peculiar to the Elizabethan era, his insights into what it means to "contend for the faith" still prove applicable today. The second treatise is A Godly and Learned Exposition or Commentary upon the Three First Chapters of Revelation , giving careful consideration of the seven letters to the seven churches of Asia. Perkins highlights the person of Christ and His significance to the church, focuses on what Christ approves and rebukes about the condition of the church, and emphasizes Christ's bounty and humanity's duty. Troubled by the prevalence of those who accept empty profession as conversion and dead formality as godliness, Perkins urges his audience to move beyond mere intellectual assent to heartfelt dedication to Christ. John Lennon's second collection of poems, stories and drawings back in print to mark its 50th Anniversary. Offering a cross section of hidden infrastructure, this title uses innovative graphic images and clear text explanations to answer all the questions about the way things work in a modern city and the people who support them. This book examines the creative and critical works of Nigerian playwright and novelist Femi Euba to demonstrate the place and function of African cultures in modernity. The author makes the case for the vibrancy of such cultures in the shaping and constitution of the modern world. This volume is a critical examination of selected poetry of Edward Kamau Brathwaite, Claire Harris, Olive Senior, and David Dabydeen. The author highlights the power of language as it classifies, divides, informs, and synthesizes the lives of Caribbean peoples throughout the Caribbean basin. Hildegard of Bingen, a Rhineland mystic of the twelfth century, has been called an ideal model of the

liberated woman. She was a poet and scientist, painter and musician, healer and abbess, playwright, prophet, preacher and social critic. The Book of Divine Works was written between 1170 and 1173, and this is its first appearance in English. The third volume of a trilogy which includes Scivias, published by Bear & Company in 1985, this visionary work is a signal resounding throughout the planet that a time of healing and balance is at hand. The Book of Divine Works is a cosmology which reunites religion, science, and art, and readers will discover an astonishing symbiosis with contemporary physics in these 800-year-old visions. The present volume also contains 51 letters written by Hildegard to significant political and religious figures of her day and translations of twelve of her songs. Teaching Christianity is the most original book Augustine ever wrote. It is not so much a treatise or scholarly work but an instruction manual on how to teach Christianity. He wrote this how to book for those who would be preaching and explaining Christianity. It is entirely based on the bible and helps the reader express its truths of faith with soundproof methodology. It is a book that will help readers to communicate their message in a clear and effective way. Edmund Hills new translation of Augustines treatise On Christian Doctrine is superb. His early and mature thought on how to understand scripture and how to communicate that understanding to others is set forth clearly and attractively. The translator has shown great discernment in his choice of words and in their placement. This makes for a smooth reading. Extremely valuable are the scholarly endnotes provided after each of the four books. The new title chosen by Edmund Hill, namely, Teaching Christianity indicates that Augustine is here instructing the African clergy, probably the bishops, how to preach effectively to their congregations. The treatise is not focused on doctrine. Sr. Mary T. Clark, RSCJ Manhattanville College President, Society for Medieval and Renaissance Philosophy Buero attaches great relevance to the power of madness and dreams, and makes use of what he regards as one of Cervantes' greatest achievements: the fusion of fantasy and reality.
