Google Translate is a multilingual translation service provided by Google. It allows users to translate words, phrases, and entire documents between multiple languages. The service was launched in April 2006 and has since been constantly updated to provide more accurate translations. Initially offering translations in only two languages, Google Translate now supports over 100 languages. The translation process works by analyzing the text or document input by the user, breaking it up into smaller segments, and then using statistical algorithms to match these segments with translations from its database. Google Translate has been a helpful tool for people to communicate across different languages, whether it be for business or personal use. However, it must be noted that automated translations often carry a high risk of inaccuracies due to the complexities inherent in language and the nuances of different cultures and contexts. It is always recommended to use translations as a starting point, and then have a native speaker review and refine the language to ensure accuracy. So, what happens when you get to page 25 and you fall unexpectedly upon that one single sentence; one that simply does not look right; somehow inhibits the pace of a fast flowing chapter and fails to describe accurately how your character looked or felt? You may of course be one of those fortunate writers who can simply knock the words out, get them down on the page and after a morning of recording a score of 2,000, relax over a light lunch and a large glass of Chardonnay. However, you may be one of those poor unfortunates who strive over every sentence, knowing well what you want to write, but reluctantly unable to find the precise little phrase to exactly describe the moment. Competent writing often requires reference to a Dictionary or a Thesaurus. Good writers carry about with them a recording device of some sort, or that good old fashioned 'pen & paper' to record things they read, see and hear in everyday life. With a Dictionary, Thesaurus and Scribblings all being put to good use, the experienced writer will collect over time a 'Golden Book' ...or 'Golden Computer File' ... that contains the condensed results of all the searching and researching for that short, concise 'Golden' sentence. However you approach your writing projects; whether you find writing hard or easy, most of us will be prepared to admit we can do with all the help available. Of course, if you are one of the 'special ones' who simply need no help at all in your well established and highly profitable writing career, then please go no further.
