Today's Technician: Advanced Automotive Electronic Systems, Classroom Manual and Shop Manual ^{Nov 26 2020} TODAY'S TECHNICIAN: ADVANCED AUTOMOTIVE ELECTRONIC SYSTEMS, is an extension of the popular Today's Technician Series that covers all mechanical and electrical systems on automobiles and light trucks. This book is intended for a course in advanced automotive electronic systems and is divided into two volumes: a Classroom Manual and a Shop Manual that separate cognitive and performance learning objectives, respectively. The design is based on features that are known to promote improved student learning. The Classroom Manual contains the principles of operation for the most advanced electrical systems used in vehicles and covers design variations of components used by the different vehicle manufacturers. The book builds upon basic facts and theories and will develop students' knowledge through its extensive coverage of component system operation. The Shop Manual covers the diagnostic processes for repairs and focuses more on the diagnostics of the components used

system than on how to replace the component. The intent is to guide students' thought processes toward finding the root cause of the problem, concentrating their attention on becoming a diagnostician and not a part changer. Your students will learn how to develop a systematic approach to problem solving in order to isolate the root cause of the problem, thereby enhancing their ability to fix products right the first time. Photo Sequences are used to illustrate some of the common diagnostic procedures. Both Manuals are arranged in corresponding chapters, and topics within the chapters are linked between manuals by page references in the margins. Both volumes contain clear and thoughtfully-selected photos and illustrations. The margins of the pages include many special features of the series that are designed to underscore important points made in the running text, highlight safety concerns, and offer real world scenarios that the author has encountered in the shop.
