The story of how plants and flowers have shaped interior design for over 200 years From ferns in 19th-century British parlors to contemporary "living walls" in commercial spaces, plants and flowers have long been incorporated into the design of public and private spaces. Spanning two centuries, Nature Inside explores the history and popularity of indoor plants, revealing the close relationship between architecture, interior design, and nature. Studying the international modern interior through the lens of plants in the human environment, author Penny Sparke attributes a degree of the interest in indoor plants to urbanization, and, more recently, the climate crisis, which serve as ongoing reminders that people must maintain a connection to, and respect for, the natural world. While architectural and interior design styles have evolved alongside the popularity of various plant species, the human need to bring nature indoors has remained constant. Briefly, a boot loader is the first software program that runs when a computer starts. It is responsible for loading and transferring control to an operating system kernel software (such as Linux or GNU Mach). The kernel, in turn, initializes the rest of the operating system (e.g. a GNU system). GNU GRUB is a very powerful boot loader, which can load a wide variety of free operating systems, as well as proprietary operating systems with chain-loading. GRUB is designed to address the complexity of booting a personal computer; both the program and this manual are tightly bound to that computer platform, although porting to other platforms may be addressed in the future. One of the important features in GRUB is flexibility; GRUB understands filesystems and kernel executable formats, so you can load an arbitrary operating system the way you like, without recording the physical position of your kernel on the disk. Thus you can load the kernel just by specifying its file name and the drive and partition where the kernel resides. This manual is available online for free at gnu.org. This manual is printed in grayscale. This step-by-step, highly visual text provides a comprehensive introduction to managing and maintaining computer hardware and software. The Haynes Service and Repair manual for the Piaggio Vespa Scooter. In his much-anticipated memoir, The Company I Keep: My Life in Beauty, Chairman Emeritus and former CEO of The Estée Lauder Companies Leonard A. Lauder shares the business and life lessons he learned as well as the adventures he had while helping transform the mom-and-pop business his mother founded in 1946 in the family kitchen into the beloved brand and ultimately into the iconic global prestige beauty company it is today. In its infancy in the 1940s and 50s, the company comprised a handful of products, sold under a single brand in just a few prestigious department stores across the United States. Today, The Estée Lauder Companies constitutes one of the world's leading manufacturers and marketers of prestige skin care, makeup, fragrance and hair care products. It comprises more than 25 brands, whose products are sold in over 150 countries and territories. This growth and success was led by Leonard A. Lauder, Estée Lauder's oldest son, who envisioned and effected this expansion during a remarkable 60-year tenure, including leading the company as CEO and Chairman. In this captivating personal account complete with great stories as only he can tell them, Mr. Lauder, now known as The Estée Lauder Companies' "Chief Teaching Officer," reflects on his childhood, growing up during the Great Depression, the vibrant decades of the post-World War II boom, and his work growing the company into the beauty powerhouse it is today. Mr. Lauder pays loving tribute to his mother Estée Lauder, its eponymous founder, and to the employees of the company, both past and present, while sharing inside stories about the company, including tales of cutthroat rivalry with Charles Revson of Revlon and others. The book offers keen insights on honing ambition, leveraging success, learning from mistakes, and growing an international company in an age of economic turbulence, uncertainty, and fierce competition. A Foodie Afloat is the story of a cook's journey through France on a barge. Di Murrell takes us on a gentle journey across France; her main preoccupation being to make sure that tasty food arrives on the table each day. As she voyages across the country she shows, through her recipes, how the cuisine changes with the landscape. Whether bought in the market, dug from a lock-keeper's garden or even foraged along the towpath, the food she finds and cooks is always seasonal and local to the region. This book is more than just a collection of recipes though. It is the result of a life spent on the waterways of Europe. She talks to lock-keepers, skippers of working barges and those, who, like her, find their sustenance on or near the canal. Di's enjoyment of good champagne, foie gras and truffles leads to an eclectic mix of simplicity and sophistication in her cooking. The boating life, though rarely sensational, is full of small events and chance encounters. This is an enticing story of slow boats and slow food. Di makes it come alive, and her combination of travel and recipe book tempts us to give up everything and join her on the waterways of Northern and Central France.
