Realism in some accounts of Voyages after 1600. 3. Interest in Accounts of Voyages. 1. Illustrated Cosmographies Widespread interest in geography in the Middle Ages is evidenced by "cosmographies" of the type of the Image du Monde. These fantastic cosmographies, such as that of Maitre Gossouin,¹ were followed, in the closing years of the 16th century, by a cosmography in the modern sense of the word. In this, and in subsequent collections of accounts of voyages in the 17th century, it is possible to trace a growing interest on the part of the public in descriptions of far-off lands, and an increasing amount of realism in the accounts of voyages published. The cosmography of the father and sons De Bry was published from 1590 to 1635. It is generally divided into the

Long Voyages and the Short Voyages (Grands et Petits Voyages). One part deals with the history of the discovery of America, the other part with an account of the discovery of the East Indies.² The father and two sons who published this voluminous collection were engravers by trade, and resorted to the history of discovery and exploration in five continents as a means of utilizing and displaying their undoubted skill in the art of illustration. The many volumes, containing accounts of voyages, shipwrecks, explorations, descriptions of fauna and flora, tables of Latin and Indian languages, are fertile in maps. But their... classroom. Winner of the 2020 Costa Children's Book Award A Kirkus Reviews Best Children's Book of 2021 A Times and Sunday Times Best Book of the Year In the aftermath of World War One, everyone in the small town of Barton is rebuilding their lives. Ben needs to find his brother, Sam—who was wounded in action and is now missing—if he wants to avoid being sent to the orphanage. Lotti's horrible aunt and uncle want to send her away from her beloved home to boarding school, just when she has successfully managed to get expelled from her last one. When a chance encounter brings the two children together, each recognizes the other as a kindred spirit. But just as they've found their feet, disaster strikes, and Ben and Lotti must run away. They hatch a plan to cross the English Channel on Ben's narrowboat, the Sparrowhawk, and track down Sam in France. But there's something in France that Lotti is looking for, too. . . . Funny, heartwarming, and wise, Voyage of the Sparrowhawk is full of high stakes, twists and connections, and—most of all—adventure. "This is a program that focuses on all 3 modes of communication (interpersonal, presentational, interpretive) and was designed with the Common Core State Standards (CCSS) in mind."--Amazon/Publisher. Babar and Celeste have many adventures as they travel around the world. When it was published in 1932, this revolutionary first fiction redefined the art of the novel with its black humor, its nihilism, and its irreverent, explosive writing style, and made Louis-

Ferdinand Celine one of France's--and literature's--most important 20th-century writers. The picaresque adventures of Bardamu, the sarcastic and brilliant antihero of *Journey to the End of the Night* move from the battlefields of World War I (complete with buffoonish officers and cowardly soldiers), to French West Africa, the United States, and back to France in a style of prose that's lyrical, hallucinatory, and hilariously scathing toward nearly everybody and everything. Yet, beneath it all one can detect a gentle core of idealism. This textbook includes all 13 chapters of *Français interactif*. It accompanies www.laits.utexas.edu/fi, the web-based French program developed and in use at the University of Texas since 2004, and its companion site, *Tex's French Grammar* (2000) www.laits.utexas.edu/tex/ *Français interactif* is an open access site, a free and open multimedia resources, which requires neither password nor fees. *Français interactif* has been funded and created by Liberal Arts Instructional Technology Services at the University of Texas, and is currently supported by COERLL, the Center for Open Educational Resources and Language Learning UT-Austin, and the U.S. Department of Education Fund for the Improvement of Post-Secondary Education (FIPSE Grant P116B070251) as an example of the open access initiative. (San Francisco Chronicle). Although she would later singlehandedly create a new approach to American cuisine with her cookbook *Mastering the Art of French Cooking* and her television show *The French Chef*, Julia Child was not always a master chef. Indeed, when she first arrived in France in 1948 with her husband, Paul, who was to work for the USIS, she spoke no French and knew nothing about the country itself. But as she dove into French culture, buying food at local markets and taking classes at the Cordon Bleu, her life changed forever with her newfound passion for cooking and teaching. Julia's unforgettable story—struggles with the head of the Cordon Bleu, rejections from publishers to whom she

sent her now-famous cookbook, a wonderful, nearly fifty-year long marriage that took the Childs across the globe—unfolds with the spirit so key to Julia's success as a chef and a writer, brilliantly capturing one of America's most endearing personalities. Workbook and Audio Activities provides written practice and guides the students through the activities on the Audio CDs. A hilarious fictionalized retelling of the first international balloon flight. Jacques Cartier's voyages of 1534, 1535, and 1541 constitute the first record of European impressions of the St Lawrence region of northeastern North America and its peoples. The Voyages are rich in details about almost every aspect of the region's environment and the people who inhabited it. As Ramsay Cook points out in his introduction, Cartier was more than an explorer; he was also Canada's first ethnographer. His accounts provide a wealth of information about the native people of the region and their relations with each other. Indirectly, he also reveals much about himself and about sixteenth-century European attitudes and beliefs. These memoirs recount not only the French experience with the Iroquois, but also the Iroquois' discovery of the French. In addition to Cartier's Voyages, a slightly amended version of H.P. Biggar's 1924 text, the volume includes a series of letters relating to Cartier and the Sieur de Roberval, who was in command of Cartier on the last voyage. Many of these letters appear for the first time in English. Ramsay Cook's introduction,

'Donnacona Discovers Europe,' rereads the documents in the light of recent scholarship as well as from contemporary perspectives in order to understand better the viewpoints of Cartier and the native people with whom he came into contact.
