Soft Computing for Problem Solving Oct 23 2022 This two-volume book presents outcomes of the 7th International Conference on Soft Computing for Problem Solving, SocProS 2017. This conference is a joint technical collaboration between the Soft Computing Research Society, Liverpool Hope University (UK), the Indian Institute of Technology Roorkee, the South Asian University New Delhi and the National Institute of Technology Silchar, and brings together researchers, engineers and practitioners to discuss thought-provoking developments and challenges in order to select potential future directions The book presents the latest advances and innovations in the interdisciplinary areas of soft computing, including original research papers in the areas including, but not limited to, algorithms (artificial immune systems, artificial neural networks, genetic algorithms, genetic programming, and particle swarm optimization) and applications (control systems, data mining and clustering, finance, weather forecasting, game theory, business and forecasting applications). It is a valuable resource for both young and experienced researchers dealing with complex and intricate real-world problems for which finding a solution by traditional methods is a difficult task.

**Multi-Objective Combinatorial Optimization Problems and Solution Methods** Jun 06 2021 Multi-Objective Combinatorial Optimization Problems and Solution Methods discusses the results of a recent multi-objective combinatorial optimization achievement that considered metaheuristic, mathematical programming, heuristic, hyper heuristic and hybrid approaches. In other words, the book presents various multi-objective combinatorial optimization issues that may benefit from different methods in theory and practice. Combinatorial optimization problems appear in a wide range of applications in operations research, engineering, biological sciences and computer science, hence many optimization approaches have been developed that link the discrete universe to the continuous universe through geometric, analytic and algebraic techniques. This book covers this

important topic as computational optimization has become increasingly popular as design optimization and its applications in engineering and industry have become ever more important due to more stringent design requirements in modern engineering practice. Presents a collection of the most up-to-date research, providing a complete overview of multi-objective combinatorial optimization problems and applications Introduces new approaches to handle different engineering and science problems, providing the field with a collection of related research not already covered in the primary literature Demonstrates the efficiency and power of the various algorithms, problems and solutions, including numerous examples that illustrate concepts and algorithms

Problem Solving in Acute Oncology Sep 21 2022 Created in partnership with the Association of Cancer Physicians (ACP) Structured problem solving approach illustrated through 38 case studies Suitable for acute oncology teams including in the community, and trainees Provides a template for acute service development and emergency treatment The development and delivery of acute oncology services have undoubtedly improved the care of cancer patients, the management of acute complications of cancer and its treatment, and our approaches to diagnosing patients who present with cancer and no obvious primary site. There remains a need to ensure that practitioners are kept fully informed and up-to-date about the appropriate clinical care to be provided in the setting of acute oncology, and to continue a dialogue on the best way to deliver acute oncology services within limited resources. Since the first edition of Problem Solving in Acute Oncology was published there has been continued development and expansion of services. The importance of the involvement of primary care in delivering acute oncology nationally has been increasingly recognized, leading to the development of ever stronger links between the two. Closer working with acute medicine physicians has also improved the care of acute oncology patients; work is ongoing to encourage closer

collaboration between acute oncology services and clinical haematology. This updated text is particularly helpful and timely. It will serve as a valuable resource for those who continue to develop excellent acute oncology services, as well as provide a source of training and an update for clinicians working in this challenging clinical area. This book proposes a template that can be used by any professional involved in the planning and delivery of acute oncology care around the world. The book is formally supported by the Association of Cancer Physicians (ACP). This highly patient-centred, readable text will be of value to clinicians, healthcare strategic and operations managers, and doctors in training, in their daily work.

25 Years' Chapterwise Solved Questions IAS Pre General Studies Paper I Nov 04 2023 IAS or Indian Administrative Service is considered one of the toughest examination in the country. The examination is conducted by the Union Public Service Commission (UPSC) for the recruitment of officers for the All India Administrative Civil Services. Students who are opting for this examination need to be updated with latest news and trends as the preliminary examination comprises of Objective-Type Questions. The syllabus is vast and one must be able to understand the areas from which question are expected. The new edition of 'IAS (PRE) GENERAL STUDIES PAPER - 1 CHAPTER WISE SOLVED QUESTIONS' of last 25 years' with detailed explanation of each and every question. This book indicated the nature and trends of the questions being asked UPSC over the time so that students can rework on their strategies. The book is divided into 5 main parts according to the latest pattern of the syllabus, also it contains 3 IAS (PRE) GENERAL STUDIES PAPER - 1 SOLVED PAPERS [2019-2017] which will give the students some kind of self-evaluation about their speed & time management in their preliminary examination. The answers of solved questions in this

book are in a very simple, lucid and grammatically correct language which is very useful and helpful and helpful for the students to understand quickly & easily. This book is like a stepping stones for the students who are aiming to become IAS and serve to the nation. TABLE OF CONTENT IAS (PRE) GENERAL STUDIES PAPER-1 SOLVED PAPER 2019, IAS (PRE) GENERAL STUDIES PAPER-1 SOLVED PAPER 2018, IAS (PRE) GENERAL STUDIES PAPER - 1 SOLVED PAPER 2017, History of India and Indian National Movement, Indian and World Geography, Indian Polity and Governance, Indian Economy General Science & Technology, General Knowledge.

**India Under Morley and Minto** Jul 28 2020 The empire which Curzon left late in 1905 was different from what it had been at the close of the nineteenth century when he came to rule over it. After memorable events and political climax, the awakening upset the rulers' concept of Indian peace. A revolutionary movement, wide in its appeal and full of idealism, generated an incompatibility in the traditional relations between ruler and ruled. This book, first published in 1964 and drawing extensively on the private papers of the main protagonists, examines the years of Indian administration directed by Morley and Minto.

**Foreign Direct Investments: Concepts, Methodologies, Tools, and Applications** Oct 11 2021 Globalization, accelerated by information technologies, has increased the speed of business transactions and has reduced the distances between international businesses. This growth has transformed the realm of foreign investment in countries around the world, calling for a methodological approach to planning feasible capital investment proposals in general and foreign direct investment projects. Foreign Direct Investments: Concepts, Methodologies, Tools, and Applications is a vital reference source that explores the importance of global stocks to economic structures and explores the effects that these holdings have on the financial status of nations. It also

provides a systems approach to investment projects in a globalized and open society. Highlighting a range of topics such as foreign direct investors, risk analysis, and sourcing strategies, this multi-volume book is ideally designed for business managers, executives, international companies, entrepreneurs, researchers, academicians, graduate students, policymakers, investors, and project managers.

*Spatial Justice, Contested Governance and Livelihood Challenges in Bangladesh* May 06 2021 This book analyses the key livelihood and governance challenges that the urban poor experience while navigating public spaces in Dhaka, Bangladesh. Using data collected through extensive fieldwork in Bangladesh, the book contributes to the emerging scholarship of resilient cities, gendered space, spatial justice, and poverty in cities of the Global South. The book assesses the everyday politics of survival for the urban poor; how the poor negotiate different levels of formal and informal modes of power and governance; and the dynamics of gender. It explores how tenuous counter-spaces are created when these factors combine to provide a valuable framework for work in other urban contexts in the Global South beyond Bangladesh. Using cross-disciplinary perspectives, this book investigates the issues of human development, urban governance, urban planning and the gendered nature of urban space to outline how these issues enable or constrain poor people's livelihood practices and their rights to be in the city. Exploring debates surrounding placemaking and inclusive

cities and their connection to poor people's livelihoods, this book will be of interest to scholars in the field of Sociology, Development Studies, Planning, Geography and Anthropology.

**Handbook of Research on Soft Computing and Nature-Inspired Algorithms** Sep 09 2021 Soft computing and nature-inspired computing both play a significant role in developing a better understanding to machine learning. When studied together, they can offer new perspectives on the

learning process of machines. The Handbook of Research on Soft Computing and Nature-Inspired Algorithms is an essential source for the latest scholarly research on applications of nature-inspired computing and soft computational systems. Featuring comprehensive coverage on a range of topics and perspectives such as swarm intelligence, speech recognition, and electromagnetic problem solving, this publication is ideally designed for students, researchers, scholars, professionals, and practitioners seeking current research on the advanced workings of intelligence in computing systems.

**Sustainable Energy and Technological Advancements** Oct 30 2020 This book contains selected papers presented at the First International Symposium on Sustainable Energy and Technological Advancements (ISSETA 2021), which was organized by the Department of Electrical Engineering, NIT Meghalaya, Shillong, India, during September 24–25, 2021. The topics covered in the book mainly focuses on the cutting-edge research domain with respect to sustainable energy technologies, smart building, integration, and application of multiple energy sources; advanced power converter topologies and their modulation techniques; and information and communication technologies for smart microgrids.

*Handbook of Research on Advancements of Swarm Intelligence Algorithms for Solving Real-World Problems* Jan 31 2021 The use of optimization algorithms has seen an emergence in various professional fields due to its ability to process data and information in an efficient and productive manner. Combining computational intelligence with these algorithms has created a trending subject of research on how much more beneficial intelligent-inspired algorithms can be within companies and organizations. As modern theories and applications are continually being developed in this area, professionals are in need of current research on how intelligent algorithms are advancing in the real

world. The Handbook of Research on Advancements of Swarm Intelligence Algorithms for Solving Real-World Problems is a pivotal reference source that provides vital research on the development of swarm intelligence algorithms and their implementation into current issues. While highlighting topics such as multi-agent systems, bio-inspired computing, and evolutionary programming, this publication explores various concepts and theories of swarm intelligence and outlines future directions of development. This book is ideally designed for IT specialists, researchers, academicians, engineers, developers, practitioners, and students seeking current research on the real-world applications of intelligent algorithms.

Information and communication technologies for small-scale fisheries (ICT4SSF) - A handbook for fisheries stakeholders Jan 02 2021 The aim of this report is to present evidence towards how Information and Communication Technologies for Small-scale Fisheries (ICT4SSF) might enable and support the implementation of the FAO's Voluntary Guidelines for Securing Sustainable Small-Scale

Fisheries in the Context of Food Security and Poverty Eradication (SSF Guidelines). We present case studies of ICT4SSF initiatives in different use areas to identify key themes and reflect on successes and failures. There are very few baselines against which to compare fisher wellbeing and access before and after ICT initiatives, and this gap is an important finding in this report. Thus far, success has only been assessed qualitatively and relatively, in terms of uptake, sustainability and local legitimacy. Still, some ICT4SSF initiatives presented in this document are closely aligned with the Principles for Digital Development and the objectives of the SSF Guidelines. These initiatives highlighted that when ICTs are locally led or developed, or co-designed with end users and marginalised groups, or strengthened already existing networks and technologies, the potential for positive impact is much higher. However, there is much less evidence of proactive confrontation of inequality through data ownership. Further, there are very few examples of developing mechanisms for fishers and fish workers to hold, access or own their data, or legal mechanisms to recognise their ownership, or protect them against misuse or manipulation.

### **Computational Intelligence Applications for Software Engineering Problems** Feb 24 2023

This new volume explores the computational intelligence techniques necessary to carry out different software engineering tasks. Software undergoes various stages before deployment, such as requirements elicitation, software designing, software project planning, software coding, and software testing and maintenance. Every stage is bundled with a number of tasks or activities to be performed. Due to the large and complex nature of software, these tasks can become costly and error prone. This volume aims to help meet these challenges by presenting new research and practical applications in intelligent techniques in the field of software engineering. Computational Intelligence Applications for Software Engineering Problems discusses techniques and presents case

studies to solve engineering challenges using machine learning, deep learning, fuzzy-logic-based computation, statistical modeling, invasive weed meta-heuristic algorithms, artificial intelligence, the DevOps model, time series forecasting models, and more.

**Stochastic Methods for Estimation and Problem Solving in Engineering** Sep 02 2023 Utilizing mathematical algorithms is an important aspect of recreating real-world problems in order to make important decisions. By generating a randomized algorithm that produces statistical patterns, it becomes easier to find solutions to countless situations. Stochastic Methods for Estimation and Problem Solving in Engineering provides emerging research on the role of random probability systems in mathematical models used in various fields of research. While highlighting topics, such as random probability distribution, linear systems, and transport profiling, this book explores the use and behavior of uncertain probability methods in business and science. This book is an important resource for engineers, researchers, students, professionals, and practitioners seeking current research on the challenges and opportunities of non-deterministic probability models.
