Part 2 of the Just One Night series. One passionate night with a stranger turned Kasie's world upside down, and just when she thought she was

getting the hang of things, her fiancé finds out... You should sleep with a stranger—those words whispered in her ear by her best friend became a challenge Kasie took to heart. Suddenly, the man who gave her the most shocking pleasure in that upscale Vegas hotel—a man whose name she never bothered to find out—is her company's biggest client. As this unknown man becomes Mr. Dade at the office, and Mr. Dade becomes Robert in the bedroom, Kasie discovers her true nature and begins to question the carefully controlled, modest image she has crafted to please her family

and friends. But when her fiancé, Dave, finds out, his rage and desire to both keep her and punish her could cost her everything—including Robert, the only man who has wanted Kasie for who she really is and the only man who makes her feel truly alive. camera to print. These books are not version-specific and, thus, evergreen. Proud and rebellious, Gideon is banished from the Light. His own words define his punishment, transforming bloodlust into literal hunger. Living by his sword, he wanders the land of mortals, embittered and alone. Naomi works in secret, illuminating manuscripts for the Knights of St. John. Gideon is drawn to her beauty and fascinated by her innocence. She stirs the shattered remnants of his nobility, intensifying the conflict already raging within him. Gideon is unlike anyone Naomi has

ever encountered before. His passionate kisses and intoxicating caresses leave her restless and wanting. Still, she senses the bleak loneliness he tries so hard to deny. Responding to his seduction with tenderness, she is determined to help him rediscover the beauty in life. The battle lines are drawn. Gideon must seek redemption or Fall. Naomi must lead her Rebel Angel back into the light before the forces of darkness have their way. They have been called on a mission that will forever change the world--if they survive. Most neuroendocrine tumors have five highly specialized receptors that bind to the naturally occurring hormone somatostatin. Peptide receptor radionuclide therapy PRRT combines compounds capable of attaching to receptors with a radionuclide such as ^{177}Lu . These can then be administered, and will circulate

throughout the body, binding to the tumor cells which have receptors for them. Once bound, these radiopeptides emit radiation which kills the tumor cells they are bound to.
