"Nearly two decades with the Bureau and Jess Harris took a rookie risk. Serial killer Eric Spears wasn't the only one obsessed. Jess's need to stop him prompted her to break the rules, ultimately ending her career. She landed back in her hometown of Birmingham, Alabama, as a deputy chief assigned to the new Special Problems Unit, a hybrid major crime division. There was just one problem: Eric Spears had followed her. There's only one way to end this- someone has to die. Eric Spears has finally been cornered, but the body count is still rising. Chief of Police Dan Burnett is on administrative leave, his life is falling apart. Deputy Chief Harold Black has assumed the post of Birmingham's top cop, a dream of his for more than a decade. Private Detective Buddy Corlew is poised face-to-face with one of the most depraved serial killers in recent history and Jess Harris has just learned that everything she thought she knew about where she came from is a lie. Don't miss the shocking ending to this critically acclaimed best-selling series."--Back cover.

Homeostasis involves a delicate interplay between generative and degenerative processes to maintain a stable internal environment. In biological systems, equilibrium is established and controlled through a series of negative feedback mechanisms driven by a range of signal transduction processes. Failures in these complex communication pathways result in instability leading to disease. Cancer represents a state of imbalance caused by an excess of cell proliferation. In contrast, neurodegeneration is a consequence of excessive cell loss in the nervous system. Both of these disorders exact profound tolls on humanity and they have been subject to a great deal of research designed to ameliorate this suffering. For the most part, the topics have been viewed as distinct and rarely do opportunities arise for transdisciplinary discussions among experts in both fields. However, cancer and neurodegeneration represent yin-yang counterpoints in the regulation of cell growth, and it is reasonable to hypothesize that key regulatory events mediated by oncogenes and tumor suppressor genes in cancer may also affect neurodegenerative processes

This collection of important writings fills the need for an anthology that adequately represents recent work on the problem of evil. This is perhaps one of the most discussed topics in the philosophy of religion, and is of perennial interest to philosophers and theologians. In 1994, Robert Black was convicted of the kidnapping, sexual assault and murder of three young girls, and sentenced to life imprisonment with a minimum tariff of thirty-five years; in 2011 he was convicted of a fourth such killing. He died in HMP Maghaberry, Northern Ireland, in January 2016, aged sixty-eight, unmourned, and entirely unrepentant of his repellent crimes. These bald facts, horrific as they are, do not begin to scratch the surface of the truth about Robert Black, a Scottish-born serial killer who undoubtedly committed further murders for which he was never tried, both in this country and on the Continent. In this ground-breaking account, Robert Giles, who has spent years tracing the killer's movements and sifting through all the evidence, including transcripts of the trials, convincingly argues that Black was an habitual serial killer over many years, and quite certainly responsible for more than the four child murders for which he was convicted. Co-written with Chris Clark, a former police intelligence officer whose tireless work into the Yorkshire Ripper produced convincing new evidence of other murders that went unnoticed or unrecorded, The Face of Evil shows once and for all that Robert Black was a serial killer whose crimes went far beyond what is generally believed. In doing so, it paints a portrait of human cruelty at its worst. "Compelling main characters and chilling villains elevate Debra Webb's Faces of Evil series into the realm of high-intensity thrillers that readers won't be able to resist." -- New York Times bestselling author CJ Lyons "Just when you think Debra Webb can't get any better, she does. OBSESSION is her best work yet. This gritty, edge of your seat, white knuckle thriller is peopled with tough, credible characters and a brilliant plot that will keep you guessing until the very end. Move over Jack Reacher - Jess Harris is comin' to town." -- Cindy Gerard, New York Times best-selling author, award winning author of the Black Ops, Inc. series "Debra Webb's name says it all..." -- Karen Rose "This is the part I love, the part I live for. The faces change. The rambling, stuttering, tear-filled pleadings, "I didn't know that," "Can't I have a little longer?" on and on, one after another, sounding the same. But it's my favorite part of the job. I love to hear these putrid, insignificant wastes plead for their lives, beg me to spare them, beg for mercy. What they don't know is that even if I could, I wouldn't because I enjoy killing too much, and it's not in me to be merciful." This riveting story details how the author became the world's most successful forensic artist, and shares the inspiring story of her passion for justice, interwoven with the thirteen most suspense-filled cases of her career. The Forest of Good and Evil Series: The Evil Queen The Glass Queen

Leading thinkers in Christian philosophy and apologetics take on the problem of evil and suffering. Essays from Gregory Ganssle, Yena Lee, Bruce Little, Garry DeWeese, R. Douglas Geivett and others provide critical engagement with the New Atheists and offer grounds for renewed confidence in the God who is "acquainted with grief." Master's Thesis from the year 2011 in the subject English Language and Literature Studies - Literature, grade: 1A, Warsaw University, language: English, abstract: The goal of this research is to examine selected works of Bram Stoker (Dracula, The Jewel of Seven Stars, The Lady of the Shroud, The Lair of the White Worm) and examine the presence of elements that are both characteristic of Gothic literature, and unique in the works of Stoker. In order to investigate and present some of Stoker's lesser known works, the analysis is concentrated on the most prominent elements present in his novels, like: the negative impact of the natural environment on the mind and body, the transgression of moral and social boundaries, and the relationship between woman and evil. Prior to a close investigation, each chapter first presents the theory behind each topic, and exemplifies it by giving an overview of prominent literary works that appeared before 1900. Cauthen, a nationally recognized authority in the fields of theology and ethics, tackles some of mankind's most intractable issues, trying to help us understand the nature of evil in all of its manifestations. He attempts to create a Biblically rooted framework wherein we can interpret the meaning of suffering and the relationship of God to human anguish. Some consider his positions controversial, but all who examine them will be uplifted and have their faith strengthened. Cauthen has written from his heart, from his heart, from his personal experience, and has woven together philosophical and theological insights into the nature of evil with personal testimonies of strength, endurance, and survival. This book deserves to be read by anyone who is struggling with the ambiguity of evil in their lives. Dr. James H. Evans, Jr., President The Divinity School Rochester, New York

The popular media of film and television surround us daily with images of evil - images that have often gone critically unexamined. In the belief that people in ever-increasing numbers are turning to the media for their understanding of evil, this lively and provocative collection of essays addresses the changing representation of evil in a broad spectrum of films and television programmes. Written in refreshingly accessible and de-jargonised prose, the essays bring to bear a variety of philosophical and critical perspectives on works ranging from the cinema of famed director Alfred Hitchcock and the preternatural horror films Halloween and Friday the 13th to the understated documentary Human Remains and the television coverage of the immediate post-9/11 period. The Changing Face of Evil in Film and Television is for anyone interested in the moving-image representation of that pervasive yet highly misunderstood thing we call evil. The first anthology to present the range of the forms of evil, from vice, sin, cruelty and crime to disobedience and wilfulness. The readings are drawn from an array of perspectives and each one is introduced and set in context by the author. Deputy Chief Jess Harris knows her time is running out. Somehow she must protect the people she loves and any more innocent victims from the serial killer obsessed with her. Is sacrificing herself the only way to stop this evil? A child is abandoned on a downtown Birmingham street. The little blond-haired, brown-eyed girl could be Jess's child. A note is attached to the little girl's pink dress: Take me to Deputy Chief Jess Harris. Can Jess and her major crimes team find the little child's mother before it's too late? The search for the truth leads Jess to a farm outside a small Alabama town where someone has been planting bodies for decades. Has Jess discovered a serial killer more prolific than Eric Spears? Even more terrifying, is this killer somehow connected to Jess? A cabbalistic society has discovered a means of harnessing demonic power for global domination, and only the secrets of an old woman who died in mysterious circumstances can prevent their satanic reign. Is evil evidence against the existence of God? A collection of essays by philosophers, theologians, and other scholars. Even if God and evil are compatible, it remains hotly contested whether evil renders belief in God unreasonable. The Evidential Argument from Evil presents five classic statements on this issue by eminent philosophers and theologians, and places them in dialogue with eleven original essays reflecting new thinking by these and other scholars. The volume focuses on two versions of the argument. The first affirms that there is no reason for God to permit either certain specific horrors or the variety and profusion of undeserved suffering. The second asserts that pleasure and pain, given their biological role, are better explained by hypotheses other than theism. Contributors include William P. Alston, Paul Draper, Richard M. Gale, Daniel Howard-Snyder, Alvin Plantinga, William L. Rowe, Bruce Russell, Eleonore Stump, Richard G. Swinburne, Peter van Inwagen, and Stephen John Wykstra.

It was noon and the stocky detective with the swarthy face waited in the corridor of the City Hospital. He was a middle-aged man with heavily defined features. His coarse dark hair was salted with gray and a little string of sweat beads glistened on his forehead. His heavy shoulders drooped from fatigue. His eyes were large and dark and there was weary compassion in them as if they had looked upon the thousand faces of human life, neither with despair nor hope, but only with a patient acceptance. The whites of the eyes were filamented with bloody threads. He had not slept the night before. He had stayed on duty because the psychopathic killer the papers called The Butcher was loose again. The detective's name was Romano. He was a lieutenant of Homicide, Manhattan West.

Faces of Evil Book #7

Ten-year-old Dina Frydman lives a comfortable middle class life with her family in Radom, Poland in the summer of 1939, just weeks before the Nazi invasion. The love of family and friends offer no protection against the menace of the Nazi regime that begins to siphon off the worldly and spiritual goods of Radom's Jews. We witness Dina's battle to survive and understand the deadly apocalypse that transforms her from an innocent child to a teenage/adult. When her family is deported and murdered at Treblinka she finds safety at a forced labor facility where she experiences her first taste of love when she at thirteen meets Natek Korman, a passionate sixteen year old who rekindles her will to live. Forced by the Nazis to separate, the young lovers vow to find each other after the war. From work camps to death camps, Dina survives against all odds. The aftermath of six years of death and destruction presents a new obstacle, how to live? With the war over Dina travels from a German castle to a DP facility and finally a school for orphans as she struggles to reclaim her life. In 1945, she is reunited with Natek Korman only to face the most important decision of her life. She chooses to follow her dream. In the Face of Evil is a timeless story of the upheavals of war, the tenacious endurance of love and the resilience of the human spirit. It is an epic journey through the nightmare of the Holocaust—the single most defining moment in modern history, as told through the eyes of a young girl. What is it in the behavioral makeup of ordinary people, operating in the course of ordinary daily living, that lends itself to participating in horrendous activities — and doing so at times with zeal, at times with joy, at times without duress? Katz demonstrates that we do not need any special behavioral equipment for doing evil. The very same behaviors can take us in both directions for either living humanely and decently or for doing evil. This book demonstrates how some of these processes work, and sensitizes us to the potential for evil in our ongoing daily activities. This knowledge about ordinary behavior can empower us to take charge of our own direction, and help us turn away from beguiling of evil when they come our way. Evil has long fascinated psychologists, philosophers, novelists and playwrights but remains an incredibly difficult concept to talk about. On Evil is a compelling and at times disturbing tour of the many faces of evil. What is evil, and what makes people do awful things? If we can explain evil, do we explain it away? Can we imagine the mind of a serial killer, or does such evil defy description? Does evil depend on a contrast with good, as religion tells us, or can there be evil for evil's sake? Adam Morton argues that any account of evil must help us understand three things: why evil occurs; why evil often arises out of banal or everyday situations; and how we can be seen as evil. Drawing on fascinating examples as diverse as Augustine, Buffy the Vampire Slayer, psychological studies of deviant behaviour and profiles of serial killers, Adam Morton argues that evil occurs when internal, mental barriers against it simply break down. He also introduces us to some nightmare people, such as Adolf Eichmann and Hannibal Lecter, reminding us that understanding their actions as humans brings us closer to understanding evil. Exciting and thought-provoking, On Evil is essential reading for anyone interested in a topic that attracts and repels us in equal measure.

Reagan's War is the story of Ronald Reagan's personal and political journey as an anti-communist, from his early days as an actor to his years in the White House. Challenging popular misconceptions of Reagan as an empty suit who played only a passive role in the demise of the Soviet Union, Peter Schweizer details Reagan's decades-long battle against communism. Bringing to light previously secret information obtained from archives in the United States, Germany, Poland, Hungary, and Russia—including Reagan's KGB file—Schweizer offers a compelling case that Reagan personally mapped out and directed his war against communism, often disagreeing with experts and advisers. An essential book for understanding the Cold War, Reagan's War should be read by open-minded readers across the political spectrum. One night, an intruder wakes Jenny as he searches for the deed to a mine he believes belongs to him.
