**Weaving and Dyeing in Highland Ecuador** Jul 29 2020

Although less well known than its much-admired counterparts in Peru and Bolivia, highland Ecuadorian weaving is an Andean tradition that has relationships with these more southern areas. A world away from the industrialized textile manufacturing of Euro-American society, these handmade pieces reflect the history and artistry of an ancient culture. This comprehensive study, edited by Ann Pollard Rowe, is unrivaled in its detail and

includes not only descriptions of the indigenous weaving and dyeing technology, but also an interpretation of its historical significance, as well as hundreds of photographs, drawings, and maps that inform the understanding of the process. The principal focus is on backstrap-loom weaving, a major pre-Hispanic technology. Ecuadorian backstrap looms, which differ in various ways from those found elsewhere in the Andes, have previously only been treated in general terms. Here, the basic operation of this style of loom is covered, as are a variety of patterning techniques including warp-resist (ikat) dyeing, weaving belts with twill, and supplementary- and complementary-warp patterning. Spanish colonial treadle-loom weaving is also covered. The weaving techniques are explained in detail, so the reader can replicate them if desired. Textiles have been an important art form among Andean peoples from remote prehistory up to the present. A greater understanding of their creation process can yield a more meaningful appreciation of the art itself.

The author then details multi-harness weaves such as multi-harness twill, eight-harness damask design, and several others. Then follow discussions of the uses of color in weaving designs, planning borders, the various draft notations (European and American), weaving with synthetic fibers, thread sizes, counts and yardage, and costs of handwoven fabrics. Latvian Weaving Techniques Jun 19 2022 This is a book about weaving techniques. The reader will notice that throughout the book references are made to Latvian examples where certain

techniques apply. The reason for this is that both my parents are Latvian and my mother, Anna Apinis, is a weaver who studied in Latvia graduating from the Latvian State High School for Applied Art at Liep?ja in 1933. After the Second World War she immigrated to Australia in 1950, bringing her knowledge of weaving and weaving loom with her. In this book I want to document some of the wealth of information collected during my mother's years in Latvia and add what knowledge of weaving I have gained from the Melbourne College of Textiles, where I attended a course in hand loom weaving between 1984 and 1986. The aim of the book is to present as many Latvian designs as possible using between four and eight shafts. A short but important chapter is devoted to the drawloom technique, which enables the weaver to easily manipulate up to seventeen shafts. Anna Apinis brought the drawloom shown in this book with her when she came to Australia. It was built in Germany just after the war from wood found in the war-torn airforce barracks of the displaced persons camp, Memmingen, where she resided until the move to Australia. Basic definitions of loom parts and weaving equipment are included with a short description of drafting, which forms the groundwork for putting theory into practice.

**Rug Weaving Techniques** Apr 29 2023 A presentation of new insights and developments into rug weaving from the author of the classic *The Techniques of Rug Weaving*. **Huck Lace Weaving Patterns with Color and Weave Effects** Oct 12 2021 Join expert weaver and teacher Tom Knisely in his exploration of Huck Lace! "Lace Weaves" are best described as loom controlled warp and weft floats on a Plain Weave ground

fabric. The term "Color and Weave Effects" refers to a careful arrangement of light and dark colored threads in the warp and weft that weave into beautiful patterns. Log Cabin is probably the best known color and weave pattern. Combining Huck with Color and Weave orders opened the door to astonishing pattern possibilities. He then came up with four color arrangements: Light and Dark, Complimentary Colors, Monochromatic, and Triadic colors. With 144 patterns and four color themes for each pattern, that's 576 patterns. Each pattern includes the full draft and a woven sample for reference. Tom also includes full details for five projects that are perfect for weaving Huck: dish towels, mug rugs, baby blanket, and two scarves. Huck Lace Weaving Patterns with Color and Weave Effects is an essential resource that you will turn to for inspiration and guidance again and again.

**Overshot Simply** Sep 22 2022 Overshot is perhaps the most iconic weaving technique--think antique coverlets and fancy table runners--yet many weavers are intimidated by its complex-looking structure. But it doesn't have to be difficult! In this book, Susan Kesler-Simpson makes overshot approachable by breaking it down piece by piece so that the weaver understand how it works, and then she puts it all back together so that weavers will have the confidence to make their own overshot patterns or to try any of the 38 overshot projects she has designed for the book. Weavers will learn: to understand overshot as a derivative of twill to understand the tie-up, placement of tabby in the tie-up, threading, and treadling how to choose threads for overshot how to use borders in your designs how to set up the loom for overshot how to work an overshot gamp Projects include: Blankets Shawls Scarves Christmas ornaments Table runners Placemats Napkins Others "Susan's explanations are to the point and easy to understand. When you

read through the chapters, it's as if Susan is sitting there with you, telling you in a friendly voice how to weave overshot step by step."--excerpt from the Foreword by Tom Knisely

**The Weaving Explorer** Apr 17 2022 Weaving is a highly accessible craft — over, under is the basic technique — but the stumbling block for many would-be weavers has been the high cost of a commercial loom. The Weaving Explorer removes that barrier, inviting crafters and artists to try out an amazing range of techniques and creative projects that are achievable with a simple homemade loom, or no loom at all! Weavers Deborah Jarchow and Gwen W. Steege take inspiration from the world of folk weaving traditions, adding a contemporary spin by introducing an unexpected range of materials and home dec projects. From sturdy rag fabric grocery bags to freeform wire baskets, delicately woven thread bracelets to colorful woven rugs, crafters will delight in exploring the opportunities to make their own personal variations on these beautiful — and functional — creations.
