better known by his pen name Mark Twain, was an American writer, humorist,
entrepreneur, publisher and lecturer. This book is a result of an effort made by us
towards making a contribution to the preservation and repair of original classic
literature. In an attempt to preserve, improve and recreate the original content,
we have worked towards: 1. Type-setting & Reformatting: The complete work has
been re-designed via professional layout, formatting and type-setting tools to re-
create the same edition with rich typography, graphics, high quality images, and
table elements, giving our readers the feel of holding a 'fresh and newly' reprinted
and/or revised edition, as opposed to other scanned & printed (Optical Character
Recognition - OCR) reproductions. 2. Correction of imperfections: As the work

was re-created from the scratch, therefore, it was vetted to rectify certain conventional norms with regard to typographical mistakes, hyphenations, punctuations, blurred images, missing content/pages, and/or other related subject matters, upon our consideration. Every attempt was made to rectify the imperfections related to omitted constructs in the original edition via other references. However, a few of such imperfections which could not be rectified due to intentional/unintentional omission of content in the original edition, were inherited and preserved from the original work to maintain the authenticity and construct, relevant to the work. We believe that this work holds historical, cultural and/or intellectual importance in the literary works community, therefore despite the oddities, we accounted the work for print as a part of our continuing effort towards preservation of literary work and our contribution towards the development of the society as a whole, driven by our beliefs. We are grateful to our readers for putting their faith in us and accepting our imperfections with regard to preservation of the historical content. HAPPY READING! Hilda T. The goal of this thesis was to develop a secure and user friendly authentication scheme for public wireless networks (PWLANS). In contrast to private wireless networks, public wireless networks need a proper authentication scheme for several reasons. First of all, the network operator must be able to identify a user in case an incident happens. Furthermore, such networks are usually controlled by a commercial operator who will hardly allow access for free. This leads to the need for a secure and reliable authentication method. However, the authentication method must be userfriendly too in order to be acceptable. The only "wireless networks" users know so far are cellular networks, which are very easy to use. Users do therefore ask for a comparable experience in public wireless networks. This thesis evaluates the Trusted Platform Module (TPM) as an authentication device. The TPM is a small cryptographic module built into almost every new computer. This thesis shows how to use the TPM as an authentication device in EAPTLS. Furthermore, this thesis shows theoretical and real world evaluations of EAPTLS with the TPM. It will be shown that this authentication method provides a good level of security as well as good usability. This book constitutes the proceedings of the 8th International Conference on Network and System Security, NSS 2014, held in Xi'an, China, in October 2014. The 35 revised full papers and 12 revised short papers presented were carefully reviewed and selected from 155 initial submissions. The papers are organized in topical sections on cloud computing, access control, network security, security analysis, public key cryptography, system security, privacy-preserving systems and biometrics, and key management and distribution. This carefully edited collection has been designed and formatted to the highest digital standards and adjusted for readability on all devices. The oldest stories that we read about our island happened so long ago, that the English had not yet come to the land where we live. In those days, the country was not called England but Britain; and the people were the ancient Britons.
