Operations from the invasion of the Italian mainland near Salerno through the winter fighting up to the battles for Monte Cassino (including the Rapido River crossing) and the Anzio beachhead. The book is handsomely produced by Edward Elgar. . . The notes contain more than citations and are well worth reading. A welcome feature is that after each of notes there is a list of the most important writings on the topic followed by a list of the most important cases. Edward Elgar is well known in economic circles, hence the endnotes to which economists are accustomed. . . It has published several books on competition for lawyers over the last years and is a welcome entrant to the lawyers market. Valentine Korah, World Competition This extremely well done and important book collects writings by more than two dozen academics and practitioners on important topics in competition law. . . This is an excellent book, important for research by anyone who is serious about global or comparative competition policy. European Law Review This Handbook assembles a valuable collection of insightful analyses dealing with many cutting-edge issues arising in modern antitrust enforcement on both sides of the Atlantic. Philip Lowe, European Commission The contributions to this Handbook provide a comprehensive, up-to-date treatment of antitrust law in the Americas and Europe. I would recommend it to anyone who wants to learn about antitrust law and its administration in the major enforcement areas of the world. This is bound to become an important reference for antitrust students and experts. Keith Hylton, Boston University, US This comprehensive research Handbook brings together cutting-edge legal and economic analysis into antitrust issues by leading experts from Europe, the USA, Canada, Mexico and South America. The Handbook of Research in Trans-Atlantic Antitrust covers a wide range of areas including: the meaning of consumer welfare mergers in monopsony markets unilateral effects private and criminal enforcement implementing competition policy in regulated sectors abuse of intellectual property rights competition remedies international enforcement cooperation complainants rights dominant firm pricing tying and bundling. The Handbook also includes discursive consideration of the similarities and differences among the various regimes on either side of the Atlantic, as well as a look at future trends and applications in regional and global contexts. Offering a comparative view of pressing antitrust issues, this Handbook will be of great interest to academics, lawyers, practitioners and officials. Politica, cultura, economia. From its origins in the battlefields of the Second World War, to movie roles as Audrey Hepburn's transport in Roman Holiday and Sting's stylish companion in Quadrophenia and on through the current vintage revival, the classic Italian motor scooter is an enduring design classic from the 20th century. Originating in the 1940s in Milan and Pontedera, Tuscany, the scooter became an enduring transport choice for young people in urban environments. Early chapters look at scooter racing and long-distance attempts, and their role as an anti-tank weapon in the French army. There is engaging coverage of place of scooters in popular culture from films, music and fashion including the way that a host of disparate groups has made them their own – from the British Mods of the 1960s and 1980s to their role in American and Japanese fashion and in their Italian homeland. The evolution and design of classic models as the Vespa 150 GS and the Lambretta Li 150 Series 3 are covered while scooter stars such as Enrico Piaggio and Georges Monneron are celebrated in their own words. The book also includes a number of specially photographed features on modern scooter designers, collectors and artists. Authored by 40 of the most prominent and renowned international scientists from academia, industry, institutions and government, this handbook explores mature, evolving technologies for a clean, economically viable alternative to non-renewable energy. In so doing, it includes how hydrogen can be safely produced, stored, transported and utilized, while also covering such broader topics as the environmental impact, education and regulatory developments. From Leonardo da Vinci's fantastic visions, to Richard Branson's plans to offer commercial space travel by 2010, visionaries and entrepreneurs have long dreamed of how we will travel in the future. Future Tech: Innovations in Transportation is a prescient look at how we will be moving forward over the coming decades. Whilst we are not yet travelling to work using jet-powered backpacks, the issue of transport in the future is becoming increasingly important. As roads have become more congested and the environment more fragile, the means of transport at our disposal seem less and less adequate. Future Tech explores what designers and engineers around the globe are developing for the world of tomorrow. Future Tech features prototypes already in the first stages of manufacture alongside more conceptual, speculative designs, as well as a history of mechanised transport and invention through the ages. There are chapters on public transport, road, air and water travel as well as personal mobility. Projects Include: Skyblazer: A flying car designed for use on both highways and skyways Senso Car: An automobile that uses the driver's biometric data to alter its internal ambiance Freedom Ship: A seaborne, travelling, residential community for up to 100,000 passengers Airbus TM A380: The world's largest airliner with the first full-length twin-deck Spaceship One: A collaboration between Virgin Galactic and Scaled Composites that aims to offer commercial space travel by the year 2010 Blade Runner: A high-speed train that travels both on tracks and roads With further information on sustainable fuels, gravity, solar and wind power alongside the history of mechanised transport, Future Tech is truly a compelling exploration of how the future is imagined in the present. A hippy Sell Up and Sail, this entertaining and inspiring book is more than just a cruising narrative - it is an instructive account showing how anyone can circumnavigate (or even sail for an extended period) without huge funds. Lars Hassler originally set off intending to sail for three years, but judiciously using his funds, and topping them up by taking charter guests on cruises, he sailed around the world for ten years. Woven into the book is advice on costs, distances, timing, power needs, food and medication - in other words, the practicalities that everyone who sails needs to know about. And at the end there is a forward-looking chapter providing advice on 'After the Circumnavigation - What Next?' With a Foreword by Jimmy Cornell and a gorgeous photo section, this is an enjoyable and useful read for anyone thinking, or dreaming, about making an extended cruise. 'Lars, the modern day Odysseus...is in many respects an extraordinary person, a man who had the guts to chuck it all in and opt for a lifestyle that others dream of their entire lives... Any reader planning to follow the author's example will find many useful tips on how to earn a living while cruising. Thank you Lasse!' From the Foreword by Jimmy Cornell

Mai come nell'ultimo periodo il mercato delle quattro e delle due ruote è stato tanto in fermento da determinare una vera e propria metamorfosi delle reti distributive. Il vertiginoso della domanda, inasprimento della concorrenza, aumento degli standard quantitativi e qualitativi richiesti dalle Case produttrici, maggiore ricorso a fonti di finanziamento esterne, diminuzione della redditività, sono solo alcuni dei tanti nuovi mostri sperimentati da chi vende e ripara auto e moto

Questa evoluzione rende necessaria la conoscenza di tecniche di gestione tipiche di un settore in cui la passione non può più pilotare il destino delle aziende. Questo primo manuale di Dealership Management italiano, dedicato al settore automotive, spiega a fondo tutti gli aspetti del mercato e dell'organizzazione aziendale. Attraverso esempi concreti e dalla viva voce dei top manager delle più importanti Case italiane di auto e moto, offre importanti soluzioni a molti dei problemi emersi negli ultimi anni e le mosse per anticipare la ripresa. La prefazione del libro è un'intervista a Giuseppe Volpato (professore ordinario di Economia e gestione delle imprese presso l'Università Ca' Foscari di Venezia, membro dello Steering Committee del Groupe d'Étude et Recherche Permanent dans l'Industrie et les Salariés de l'Automobile di Parigi e Senior Adviser dell'International Car Distribution Programme di Birmingham), che ci aiuta a decifrare con rigore scientifico l'evoluzione in atto nel business model della distribuzione automotive.
