Civil Rights Queen Feb 27 2021 A TIME BEST BOOK OF THE YEAR • The first major biography of one of our most influential judges—an activist lawyer who became the first Black woman appointed to the federal judiciary—that provides an eye-opening account of the twin struggles for gender equality and civil rights in the 20th Century. • “Timely and essential.”—The Washington Post “A must-read for anyone who dares to believe that equal justice under the law is possible and is in search of a model for how to make it a reality.” —Anita Hill With the US Supreme Court confirmation of Ketanji Brown Jackson, “it makes sense to revisit the life and work of another Black woman who profoundly shaped the law: Constance Baker Motley” (CNN). Born to an aspirational blue-collar family during the Great Depression, Constance Baker Motley was expected to find herself a good career as a hair dresser. Instead, she became the first black woman to argue a case in front of the Supreme Court, the first of ten she would eventually argue. The only black woman member in the legal team at the NAACP's Inc. Fund at the time, she defended Martin Luther King in Birmingham, helped to argue in *Brown vs. The Board of Education*, and played a critical role in vanquishing Jim Crow laws throughout the South. She was the first black woman elected to the state Senate in New York, the first woman elected Manhattan Borough President, and the first black woman appointed to the federal judiciary. *Civil Rights Queen* captures the story of a remarkable American life, a figure who remade law and inspired the imaginations of African Americans across the country. Burnished with an extraordinary wealth of research, award-winning, esteemed Civil Rights and legal historian and dean of the Harvard Radcliffe Institute, Tomiko Brown-Nagin brings Motley to life in these pages. Brown-Nagin compels us to ponder some of our most timeless and urgent questions--how do the historically marginalized access the corridors of power? What is the price of the ticket? How does access to power shape individuals committed to social justice? In *Civil Rights Queen*, she dramatically fills out the picture of some of the most profound judicial and societal change made in twentieth-century America.

The Love Gap Aug 28 2023 A research-based guide to navigating the newest dating phenomenon--"the love gap"--and a trailblazing action plan to help smart, confident, career-driven women find (and keep) their match. For a rising generation young women, the sky is the limit. Women can be anything and have everything. They are outpacing their male peers in higher education and earning the corner office at work. Smart, driven, assertive women are succeeding at just about everything they do--except romance. Why are so many men afraid to date smart women? Modern men claim to want smarts, success, and independence in romantic partners. Or so says the data collected by scientists and dating websites. If that's the case, why are so many independent, successful women winning in life, but losing in love? Journalist Jenna Birch has finally named the perplexing reason: "the love gap"--or that confusing rift between who men say they want to date and who they actually commit to. Backed by extensive data, research, in-depth interviews with experts and real-life relationship stories, *The Love Gap* is the first book to explore the most talked-about dating trend today. The guide also establishes a new framework for navigating modern relationships, and the tricky new gender dynamics that impact them. Women can, and should, have it all without settling.

PHP in Action Jun 26 2023 To keep programming productive and enjoyable, state-of-the-art practices and principles are essential. Object-oriented programming and design help manage complexity by keeping components cleanly separated. Unit testing helps prevent endless, exhausting debugging sessions. Refactoring keeps code simple and readable. PHP offers all this--and more. *PHP in Action* shows you how to apply PHP techniques and principles to all the most common challenges of web programming, including: Web presentation and templates User interaction including the Model-View-Controller architecture Input validation and form handling Database connection and querying and abstraction Object persistence Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

Bioinvaders Apr 12 2022 We are pleased to announce a new series of environmental history readers, suitable for students. Comprising essays selected from our journals, *Environment and History* and *Environmental Values*, each inexpensive paperback volume will address an important theme in environmental history, combining underlying theory and specific case-studies. The first volume, *Bio-invaders*, investigates the rhetoric and realities of exotic, introduced and 'alien' species. The book comprises a number of general essays, exploring and challenging common perceptions about such species, and a series of case studies of specific species in specific contexts. Its geographical coverage ranges from the United Kingdom to New Zealand by way of South Africa, India and Palestine; and the essays cover both historical and recent introductions.

Sport Under Unexpected Circumstances Aug 24 2020 Sport was an integral part of life in camps during the twentieth century, even in Nazi concentration camps or in the Soviet Gulag. Traditionally perceived as a symbol of equality, play, and peacefulness, sport under such unexpected circumstances irritates most observers, back then and today. This volume studies the irritating fact of sport in penal and internment camps as an important insight into the history of camps. The authors enquire into case studies of sport being played in different forms of camps around the globe and throughout the twentieth century. They challenge our understanding of camps, question the dichotomy of insiders and outsiders, inner-camp hierarchies, and the everyday experience of violence. This fresh perspective complements the existing camp studies and gives way for the subjectivity of camp inmates and their action.

The Next Economic Disaster Jul 27 2023 Current debates about economic crises typically focus on the role that public debt and debt-fueled public spending play in economic growth. This illuminating and provocative work shows that it is the rapid expansion of private rather than public debt that constrains growth and sparks economic calamities like the financial crisis of 2008. Relying on the findings of a team of economists, credit expert Richard Vague argues that the Great Depression of the 1930s, the economic collapse of the past decade, and many other sharp downturns around the world were all preceded by a spike in privately held debt. Vague presents an algorithm for predicting crises and argues that China may soon face disaster. Since American debt levels have not declined significantly since 2008, Vague believes that economic growth in the United States will suffer unless banks embrace a policy of debt restructuring. All informed citizens, but especially those interested in economic policy and history, will want to contend with Vague's distressing arguments and evidence.

Amarna Studies and Other Selected Papers Jun 02 2021 A selection of 24 papers by Kate Bosse-Griffiths (1910-1998), curator of the large Egyptian collection in Swansea University's Wellcome Museum. First published between 1955 and 1996, the papers are divided into two sections: material relating to Amarna and material from other eras. The varied contents include discussions of objects and artworks in the Wellcome Museum, including the Shrine of Tiye', beads, stelae, amulets, and a prehistoric stone figure, as well as reviews and more general discussions of Egyptian artwork.

The Feminist War on Crime Jun 21 2020 Many feminists grapple with the problem of hyper-incarceration in the United States, and yet commentators on gender crime continue to assert that criminal law is not tough enough. This punitive impulse, prominent legal scholar Aya Gruber argues, is dangerous and counterproductive. In their quest to secure women's protection from domestic violence and rape, American feminists have become soldiers in the war on crime by emphasizing white female victimhood, expanding the power of police and prosecutors, touting the problem-solving power of incarceration, and diverting resources toward law enforcement and away from marginalized communities. Deploying vivid cases and unflinching analysis, *The Feminist War on Crime* documents the failure of the state to combat sexual and domestic violence through law and punishment. Zero-tolerance anti-violence law and policy tend to make women less safe and more fragile. Mandatory arrests, no-drop prosecutions, forced separation, and incarceration embroil poor women of color in a criminal justice system that is historically hostile to them. This carceral approach exacerbates social inequalities by diverting more power and resources toward a fundamentally flawed criminal justice system, further harming victims, perpetrators, and communities alike. In order to reverse this troubling course, Gruber contends that we must abandon the conventional feminist wisdom, fight violence against women without reinforcing the American prison state, and use criminalization as a technique of last—not first—resort.

Inclusion on Purpose May 21 2020 How organizations can foster diversity, equity, and inclusion: taking action to address and prevent workplace bias while centering women of color. Few would disagree that inclusion is both the right thing to do and good for business. Then why are we so terrible at it? If we believe in the morality and the profitability of including people of diverse and underestimated backgrounds in the workplace, why don't we do it? Because, explains Ruchika Tulshyan in this eye-opening book, we don't realize that inclusion takes awareness, intention, and regular practice. Inclusion doesn't just happen; we have to work at it. Tulshyan presents inclusion best practices, showing how leaders and organizations can meaningfully promote inclusion and diversity. Tulshyan centers the workplace experience of women of color, who are subject to both gender and racial bias. It is at the intersection of gender and race, she shows, that we discover the kind of inclusion policies that benefit all. Tulshyan debunks the idea of the "level playing field" and explains how leaders and organizations can use their privilege for good by identifying and exposing bias, knowing that they typically have less to lose in speaking up than a woman of color does. She explains why "leaning in" doesn't work—and dismantling structural bias does; warns against hiring for "culture fit," arguing for "culture add" instead; and emphasizes the importance of psychological safety in the workplace—you need to know that your organization has your back. With this important book, Tulshyan shows us how we can make progress toward inclusion and diversity—and we must start now.

The Likeability Trap Jan 29 2021 Be nice, but not too nice. Be successful, but not too successful. Just be likeable. Whatever that means? Women are stuck in an impossible bind. At work, strong women are criticized for being cold, and warm women are seen as pushovers. An award-winning journalist examines this fundamental paradox and empowers readers to let go of old rules and reimagine leadership rather than reinventing themselves. Consider that even competent women must appear likeable to successfully negotiate a salary, ask for a promotion, or take credit for a job well done—and that studies show these actions usually make them less likeable. And this minefield is doubly loaded when likeability intersects with race, ethnicity, sexual orientation, and parental

status. Relying on extensive research and interviews, and carefully examined personal experience, *The Likeability Trap* delivers an essential examination of the pressure put on women to be amiable at work, home, and in the public sphere, and explores the price women pay for internalizing those demands. Rather than advising readers to make themselves likeable, Menendez empowers them to examine how they perceive themselves and others and explores how the concept of likeability is riddled with cultural biases. Our demands for likeability, she argues, hinder everyone's progress and power. Inspiring, thoughtful and often funny, *The Likeability Trap* proposes surprising, practical solutions for confronting the cultural patterns holding us back, encourages us to value unique talents and styles instead of muting them, and to remember that while likeability is part of the game, it will not break you.

The Celts [2 volumes] Oct 06 2021 This succinct, accessible two-volume set covers all aspects of Celtic historical life, from prehistory to the present day. The study of Celtic history has a wide international appeal, but unfortunately many of the available books on the subject are out-of-date, narrowly specialized, or contain incorrect information. Online information on the Celts is similarly unreliable. This two-volume set provides a well-written, up-to-date, and densely informative reference on Celtic history that is ideal for high school or college-aged students as well as general readers. *The Celts: History, Life, and Culture* uses a cross-disciplinary approach to explore all facets of this ancient society. The book introduces the archaeology, art history, folklore, history, linguistics, literature, music, and mythology of the Celts and examines the global influence of their legacy. Written entirely by acknowledged experts, the content is accessible without being simplistic. Unlike other texts in the field, *The Celts: History, Life, and Culture* celebrates all of the cultures associated with Celtic languages at all periods, providing for a richer and more comprehensive examination of the topic.

Archaeometry of Pre-Columbian Sites and Artifacts May 25 2023 Based on the 28th International Archaeometry Symposium jointly sponsored by the University of California, Los Angeles, and the Getty Conservation Institute, this volume offers a rare opportunity to survey under a single cover a wide range of investigations concerning pre-Columbian materials. Twenty chapters detail research in five principal areas: anthropology and materials science; ceramics; stone and obsidian; metals; and archaeological sites and dating. Contributions include Heather Lechtman's investigation of "The Materials Science of Material Culture," Ron L. Bishop on the compositional analysis of pre-Columbian pottery from the Maya region, Ellen Howe on the use of silver and lead from the Mantaro Valley in Peru, and J. Michael Elam and others on source identification and hydration dating of obsidian artifacts.

The Relative Hills of Britain Mar 11 2022 How many hills are there in Britain? Has anyone climbed them all? Where is there for hill walkers to go in the south of England? What is a hill anyway?

The answers to these and other questions will be found in *The Relative Hills of Britain*. This book dispenses with the common assumption that a hill must be at least 2000ft high to be worth climbing. Instead it concentrates on listing all the hills that are relatively high compared to the surrounding land, rather than compared to sea level. This approach leads to some interesting results: for example, the highest points in the Cotswolds and Chilterns, Campsies and Quantocks are all included, as well as the main summits on numerous Scottish islands, whereas well-known mountain summits such as Cairn Gorm, Bowfell and Carnedd Dafydd do not qualify. As well as being an invaluable reference work for all walkers, this book contains a fascinating collection of not too serious facts and figures about the Marilyn's, as these relative hills have been called. The book is illustrated by a set of photographs and a large number of very clear maps, which make it easy to locate all

the hills in each region.

Understanding and Mitigating Ageing in Nuclear Power Plants Oct 26 2020 Plant life management (PLiM) is a methodology focussed on the safety-first management of nuclear power plants over their entire lifetime. It incorporates and builds upon the usual periodic safety reviews and licence renewals as part of an overall framework designed to assist plant operators and regulators in assessing the operating conditions of a nuclear power plant, and establishing the technical and economic requirements for safe, long-term operation. Understanding and mitigating ageing in nuclear power plants critically reviews the fundamental ageing-degradation mechanisms of materials used in nuclear power plant structures, systems and components (SSC), along with their relevant analysis and mitigation paths, as well as reactor-type specific PLiM practices. Obsolescence and other less obvious ageing-related aspects in nuclear power plant operation are also examined in depth. Part one introduces the reader to the role of nuclear power in the global energy mix, and the importance and relevance of plant life management for the safety regulation and economics of nuclear power plants. Key ageing degradation mechanisms and their effects in nuclear power plant systems, structures and components are reviewed in part two, along with routes taken to characterise and analyse the ageing of materials and to mitigate or eliminate ageing degradation effects. Part three reviews analysis, monitoring and modelling techniques applicable to the study of nuclear power plant materials, as well as the application of advanced systems, structures and components in nuclear power plants. Finally, Part IV reviews the particular ageing degradation issues, plant designs, and application of plant life management (PLiM) practices in a range of commercial nuclear reactor types. With its distinguished international team of contributors, Understanding and mitigating ageing in nuclear power plants is a standard reference for all nuclear plant designers, operators, and nuclear safety and materials professionals and researchers. Introduces the reader to the role of nuclear power in the global energy mix Reviews the fundamental ageing-degradation mechanisms of materials used in nuclear power plant structures, systems and components (SSC) Examines topics including elimination of ageing effects, plant design, and the application of plant life management (PLiM) practices in a range of commercial nuclear reactor types
