The Primary ICT & E-learning Co-ordinator's Manual Mar 31 2021 '[This book] certainly isn't one of the dry educational tomes that often bedeck the shelves of the staffroom; it is an informative, accessible text which evolves into an enjoyable read. There aren't too many practitioner manuals that can boast that particular combination. A useful guide for the ICT leader seeking a practical/effective annual structure for their ICT leadership role' - Teach Primary Magazine This practical manual is the second part of a 2-volume set that together makes up a detailed 2-year training programme for primary ICT and E-learning co-ordinators. The second book takes coordinators through the second year of the programme but may also be used as a starting point by more experienced staff. The structured training programme, timed over three terms, includes: o a complete review of E-Safety procedures in the light of the Every Child Matters agenda o Developing a funding model in order to plan for ICT developments, together with a broader ICT action planning review to embed a revised E learning vision through a series of long-term sustainable actions o Reviewing the curriculum in order to examine how the E Learning community will adapt its core practices to facilitate new technology o the evolving role of school websites as they assume interactivity and examine the place of E Learning within the extended schools agenda o Reviewing the use of ICT as a tool for management systems and discussing how ICT can be used to support

different groups of children o examining self-evaluation strategies linked to the school's SEF, the Ofsted Section 5 Framework and Every Child Matters. The books have a companion website, which will offer downloadable versions of the photocopiable sheets from the book, as well as links to other sources of help and advice.

The Welding of Aluminium and Its Alloys Aug 04 2021 The Welding of Aluminium and its Alloys is a practical user's guide to all aspects of welding aluminium and aluminium alloys. It provides a basic understanding of the metallurgical principles involved showing how alloys achieve their strength and how the process of welding can affect these properties. The book is intended to provide engineers with perhaps little prior understanding of metallurgy and only a brief acquaintance with the welding processes involved with a concise and effective reference to the subject. It is intended as a practical guide for the Welding Engineer and covers weldability of aluminium alloys; process descriptions, advantages, limitations, proposed weld parameters, health and safety issues; preparation for welding, quality assurance and quality control issues along with problem solving. The book includes sections on parent metal storage and preparation prior to welding. It describes the more frequently encountered processes and has recommendations on welding parameters that may be used as a starting point for the development of a viable welding procedure. Included in these chapters are hints and tips to avoid some of the pitfalls of welding these sometimes-problematic materials. The content is both descriptive and qualitative. The author has avoided the use of mathematical expressions to describe the effects of welding. This book is essential reading for welding engineers, production engineers, production managers, designers and shop-floor supervisors involved in the aluminium fabrication industry. A practical user's guide by a respected expert to all aspects of welding of aluminium Designed to be easily understood by the non-metallurgist whilst covering the most necessary metallurgical aspects Demonstrates best practice in fabricating aluminium structures
