Peter Cappelli confronts the myth of the skills gap and provides an actionable path forward to put people back to work. Even in a time of perilously high unemployment, companies contend that they cannot find the employees they need. Pointing to a skills gap, employers argue applicants are simply not qualified; schools aren't preparing students for jobs; the

government isn't letting in enough high-skill immigrants; and even when the match is right, prospective employees won't accept jobs at the wages offered. In this powerful and fast-reading book, Peter Cappelli, Wharton management professor and director of Wharton's Center for Human Resources, debunks the arguments and exposes the real reasons good people can't get hired. Drawing on jobs data, anecdotes from all sides of the employer-employee divide, and interviews with jobs professionals, he explores the paradoxical forces bearing down on the American workplace and lays out solutions that can help us break through what has become a crippling employer-employee stand-off. Among the questions he confronts: Is there really a skills gap? To what extent is the hiring process being held hostage by automated software that can crunch thousands of applications an hour? What kind of training could best bridge the gap between employer expectations and applicant realities, and who should foot the bill for it? Are schools really at fault? Named one of HR Magazine's Top 20 Most Influential Thinkers of 2011, Cappelli not only changes the way we think about hiring but points the way forward to rev America's job engine again. Written by Susan A. Enns, a sales coach and author who has been in sales, in one form or another, for well over 3 decades. Over those 30 plus years, in all capacities at all levels of sales, sales management, and executive level management, she has interviewed hundreds, maybe even thousands of candidates

for various sales and sales management positions. With that experience under her belt and a record of proven performance to her credit, she wrote this book. She started to write it the day she met a very enterprising young man who wanted to start a career in sales. He told her he found a company online and they were going to charge him more than \$3000 to teach him how to find a sales job. She thought at the time that was highway robbery, let alone questioning if it was even legal. She finished writing it shortly after the COVID-19 Pandemic of 2020 changed the world, and so many talented sales people were forced to change jobs and were hitting the job market on a moment's notice. As Confucius once said, "Choose a job you love, and you will never have to work a day in your life". Susan has had such a rewarding career in sales, she wants to help you explore the same opportunity. So let's get started! In this book I'll share with you the three secrets I learned launching a successful online job search and landing a well-paid position in less than 30 days. I am not a professional recruiter. I don't have an HR certification nor am I a New York Times bestselling authority. I'm just like you. I had a job, lost it, then had bills and life banging on my apartment door. I tried the traditional job search strategies: cover letter, networking, multiple interviews, etc. It didn't work. What I will explain in this book did work. You too can repeat my success by learning the three secrets for online job search: not far-reaching theories you may find in the traditional job search book--but practical, proven methods to achieve the only result that matters: a job. If you are a former employee or about to be, or one of the millions of the long-term unemployed, this eBook can be your guide to finding that next job quickly. You will learn how to:--Effectively search for jobs that are "hidden" from the major online career boards like Monster and CareerBuilder--Use unconventional search strategies, including social media sites (Facebook, Twitter, etc.), to find the right job--Learn how to maximize your search power by combing results from Google and social media sites Before rising

Coming from someone who made a successful transition from marketing lighting into technical writing, this book teaches how YOU can change your industry. With this book, you get the best-distilled version of these experiences and knowledge. If you are a student, you will learn how to create a portfolio quickly and effectively and to use it to showcase your skills alongside your academic credentials. "Just finished reading your book and all I can say is WOW! Mind you since May of 2016 I have taken about 6 online courses specifically looking for employment and around three of them were specifically for either how to get an IT or Web Developer job. These courses cannot hold a candle to the majority of the information you put in this book!" -George M., Web Developer

WHY I WROTE THIS BOOK: When I started my web development journey, I was a lost hiker in the digital woods. I knew I wanted to build web apps, but didn't know what those people called themselves. Were they website builders? Programmers? The term 'software engineer' floated around a lot online - was that my aspiration? Since I didn't know exactly what I was looking for, I spent a lot of time reading and watching materials that were nothing but discouraging: mock Google coding interviews with whiteboards and markers. Lots of articles and videos that name-dropped things like binary trees, Big O notation, and time complexity. Forum post upon forum post that gave away actual coding interview questions from the biggest tech companies in the world like Facebook, Google, and Microsoft. Making things worse, some web developers I had discovered on YouTube were talking about a really good, popular book for coding interviews. I checked it out and once again my stomach sank. "I'm never going to make it in this field," I said to

myself. "I've been studying and practicing and building projects for months, and I still have no idea what these people are talking about." What they didn't tell me was that the book is geared towards senior software engineers trying to get a job with Amazon and Google. I wanted to quit my coding journey. In fact, I did quit. The difference was, I didn't stay quit. Something told me to keep pushing forward, keep building projects to put in my portfolio and Github, keep reaching out and trying to find clients who needed websites. I kept pushing until I got a job as a fullstack web developer at a data company. As it turns out, the internet isn't very generous to our career field. Beginners are especially marginalized. There aren't any quality one-stop resources for discovering one of the most important questions - if not the most important question - web developers have. "How do I get a job in this field?" I wanted to change the junior web developer tech landscape with this book. My goal is for every junior developer who reads this to find a job. And if you take the recommended actions in this book, you can do it. your job options. In fact, you can get to virtually any life-goal destination from virtually any starting point. Stephen Colbert was a philosophy major. Chad Hurley, billionaire founder of YouTube, was an art major. And while we're at it, Albert Einstein was a high-school drop-out. Still think your college major will determine your life path? Think again. HOW TO GET ANY JOB is the first book that definitively answers the following questions, and many more:

- What is "life launch" and how is it different from getting a job?
- Why do employers hire people like you?
- Which skills do employers value most? (They're not what you think!)
- How do non-tech people get hired and thrive in tech companies?
- How do you set yourself up to get promoted?
- How do you prove you have skills that don't show up on your transcripts?
- How do you get experience if you can't get a job, or have the "wrong" major?
- How can you get famous and influential people to help you?
- How do you hit restart if you get stuck in a dead-end job out of college?
- What should you do if you're a graduate and living in your parents' basement?
- What should you do if you're a junior to make sure you don't end up in that basement?

Whether you're twenty and still in college or twenty-nine and still wondering how to start your life, HOW TO GET ANY JOB offers the most creative and innovative thinking on life launch to date. It is used by college career centers nationwide. Offers advice on how job hunters should present themselves to potential employers.
