Biosimilars Mar 01 2021 This book provides a comprehensive overview of the biosimilar regulatory framework, the development process and clinical aspects for development of biosimilars. The development path of a biosimilar is just as unique as a development path of a new drug, tailored by the mechanism of action, the quality of the molecule, published information on the reference product, the current competitive environment, the target market and regulatory guidance, and most importantly, the emerging totality of evidence for the proposed biosimilar during development. For the ease of readers, the book comprises of six sections as follows: Section I: Business, Health Economics and Intellectual Property Landscape for Biosimilars Section II: Regulatory Aspects of Development and Approval for Biosimilars Section III: Biopharmaceutical Development and Manufacturing of Biosimilars Section IV: Analytical Similarity Considerations for Biosimilars Section V: Clinical aspects of Biosimilar Development Section VI: Biosimilars-Global Development and Clinical Experience Chapters have been written by one or more experts from academia, industry or regulatory agencies who have been involved with one or more aspects of biosimilar product development. The authors and editors have an expertise in commercialization and pricing of biosimilars, intellectual property considerations for biosimilars, chemistry manufacturing controls (CMC) and analytical development for biosimilars, regulatory and clinical aspects of biosimilar development. Besides the industry practitioners, the book includes several contributions from regulators across the globe. **Renaissance Lawman** Jul 29 2023 Renaissance Lawman: The Education and Deeds of Eliot H. Lumbard details the life, education, and public service career of Eliot Howland Lumbard. A lawyer, who most of his life,

lived and worked in Manhattan and whose legal career spanned more than fifty years beginning in the early 1950s. Lumbard is easily identified as a renaissance lawman for having gained considerable expertise in the operations of the political and justice systems, and for proceeding to capitalize on this knowledge to become both an advocate and initiator of progressive reforms for criminal justice. His contributions on behalf of public safety have been largely forgotten but throughout this intriguing biography Martin Alan Greenberg successfully juxtaposes many of Lumbard's professional activities with many of the major historical developments and challenges of his time. The chronicled events emphasize what motivated the people in his generation to behave as they did since the world today is a much different place than what Americans were experiencing in the first three decades after WW II. Cultural and technological changes have combined to make our present-day world quite different from over a half-century ago. Renaissance Lawman proves to be especially rewarding to a wide-range of readers interested in police work, criminal justice history, public service leadership, and legal ethics. There are no other comparable books on the market. Lumbard certainly had a unique legal career and his impactful contributions have seldom, if ever, been duplicated – even if his contributions, on behalf of public safety, have been largely forgotten.

*Reporting Elections* Feb 21 2023 How elections are reported has important implications for the health of democracy and informed citizenship. But, how informative are the news media during campaigns? What kind of logic do they follow? How well do they serve citizens?e Based on original research as well as the most comprehensive assessment of election studies to date, Cushion and Thomas examine how campaigns are reported in many advanced Western democracies. In doing so, they engage with debates about the mediatization of politics, media systems, information environments, media ownership, regulation, political news, horserace journalism, objectivity, impartiality, agenda-setting, and the relationship between media and democracy more

generally. Focusing on the most recent US and UK election campaigns, they consider how the logic of election coverage could be rethought in ways that better serve the democratic needs of citizens. Above all, they argue that election reporting should be driven by a public logic, where the agenda of voters takes centre stage in the campaign and the policies of respective political parties receive more airtime and independent scrutiny. The book is essential reading for scholars and students in political communication and journalism studies, political science, media and communication studies.

*Gender and Sexuality Diversity in a Culture of Limitation* Jul 25 2020

*Gender and Sexuality Diversity in a Culture of Limitation* provides an outstanding and insightful critique of the ways that contemporary education is impacted by a range of political, social and cultural influences that inform the approaches that schools take in relation to gender and sexuality diversity. By applying feminist poststructural and Foucauldian frameworks, the book examines the ongoing impact of broader socio-cultural discourse on the lives of gender and sexuality diverse students and teachers. Beginning with an overview of the impact of how a culture of limitation is realised in Australia, the focus moves beyond this context to examine state and federal policies from comparable societies in countries including the USA and the UK and their effect on the production of knowledges and what's permissible to include in educational curriculum. This research-driven book thus provides a comparative, international overview of the current state of gender and sexuality diversity in schools, and convincingly demonstrates that despite some empowerment of gender and sexuality diverse individuals, silencing and marginalization remain powerful forces. This book will be of great interest to graduate and postgraduate students, academics, professionals, and policy makers interested in the field of gender and sexuality in education. It is essential reading for those involved in pre-service and in-service teacher education, diversity education, the sociology of education, as well as education more generally.

**Attack Surface** Jun 27 2023 Cory Doctorow's Attack Surface is a

standalone novel set in the world of New York Times bestsellers Little Brother and Homeland. Most days, Masha Maximow was sure she'd chosen the winning side. In her day job as a counterterrorism wizard for an transnational cybersecurity firm, she made the hacks that allowed repressive regimes to spy on dissidents, and manipulate their every move. The perks were fantastic, and the pay was obscene. Just for fun, and to piss off her masters, Masha sometimes used her mad skills to help those same troublemakers evade detection, if their cause was just. It was a dangerous game and a hell of a rush. But seriously self-destructive. And unsustainable. When her targets were strangers in faraway police states, it was easy to compartmentalize, to ignore the collateral damage of murder, rape, and torture. But when it hits close to home, and the hacks and exploits she's devised are directed at her friends and family--including boy wonder Marcus Yallow, her old crush and archrival, and his entourage of naïve idealists--Masha realizes she has to choose. And whatever choice she makes, someone is going to get hurt. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**India Emerging** Sep 30 2023 India, like most democratic developing nations, is prone to populist politics. In the search of votes, politicians look for popular solutions with mass appeal. Some popular solutions benefit the poor, some hurt the economy. Poor economics leads to falling numbers. Falling numbers get statistically captured as economic data. And, the impact of such economic data is immense. This data can lift or crash currency markets, stock markets, affect credit ratings, fuel inflation, affect new investments and even result in mass layoffs. However, there is always a story behind the data. These stories are guided mostly by executive decisions. Some decisions are far-reaching and beneficial to the masses, some cater to political vote banks, some are guided by increasing activism, some serve the need for social justice, some are aimed at environmental protection, while some are simply driven by the greed of power or wealth. This is the story of every regime. The book narrates this compelling data story in a layman's language. Even where data is wrong it leaves behind a tell-tale mark of anomalies, which trips the economy sooner than later. Fudged, incorrect or lazily collected data is worse than genuine but unimpressive data as you do not know what to correct. India Emerging thus captures this dialogue on the pros and cons of economic and political decisions that can be understood by the common voter who is neither an economist nor an academician.

**Blockchain in the field of food supply chain. Analysis of the technological implementation** Oct 20 2022 Seminar paper from the year 2022 in the subject Business economics - Business Management, Corporate Governance, grade: 1,0, University of Applied Sciences Stuttgart, language: English, abstract: This paper deals with the analysis of the technological implementation of blockchain in the field of food supply chain. Blockchain has long been more than just the technology behind the cryptocurrency Bitcoin. Rather, the technology is now considered the real innovation, which experts believe has the potential to change business models, governments, and even societies. Above all, it is increasingly coming to the public's attention because of its many possible applications. Basically, the blockchain is a public register that enables users to collaborate in a trustworthy and transparent manner. The blockchain system connects all participants in a peer-to-peer network, so no intermediaries are required. In addition to the financial sector, supply chain management is also mentioned in various publications as an

important application area for the technology. The food supply chain in particular is increasingly coming into focus due to the increasing complexity and internationalisation of supply chains, as well as the demand for transparency on the part of customers against the backdrop of sustainability. The goals of blockchain technology in the food supply chain include optimising the international exchange of goods and its documentation, minimising the need for middlemen, traceability, and real-time localisation of products. Retail giants, such as Walmart and Carrefour, recognised the potential of the technology early on and rely on IBM Food Trust to map their own product portfolio as transparently as possible.

**Friends Divided** Oct 08 2021 A New York Times Book Review Notable Book of 2017 From the great historian of the American Revolution, New York Times-bestselling and Pulitzer-winning Gordon Wood, comes a majestic dual biography of two of America's most enduringly fascinating figures, whose partnership helped birth a nation, and whose subsequent falling out did much to fix its course. Thomas Jefferson and John Adams could scarcely have come from more different worlds, or been more different in temperament. Jefferson, the optimist with enough faith in the innate goodness of his fellow man to be democracy's champion, was an aristocratic Southern slaveowner, while Adams, the overachiever from New England's rising middling classes, painfully aware he was no aristocrat, was a skeptic about popular rule and a defender of a more elitist view of government. They worked closely in the crucible of revolution, crafting the Declaration of Independence and leading, with Franklin, the diplomatic effort that brought France into the fight. But

ultimately, their profound differences would lead to a fundamental crisis, in their friendship and in the nation writ large, as they became the figureheads of two entirely new forces, the first American political parties. It was a bitter breach, lasting through the presidential administrations of both men, and beyond. But late in life, something remarkable happened: these two men were nudged into reconciliation. What started as a grudging trickle of correspondence became a great flood, and a friendship was rekindled, over the course of hundreds of letters. In their final years they were the last surviving founding fathers and cherished their role in this mighty young republic as it approached the half century mark in 1826. At last, on the afternoon of July 4th, 50 years to the day after the signing of the Declaration, Adams let out a sigh and said, "At least Jefferson still lives." He died soon thereafter. In fact, a few hours earlier on that same day, far to the south in his home in Monticello, Jefferson died as well. Arguably no relationship in this country's history carries as much freight as that of John Adams of Massachusetts and Thomas Jefferson of Virginia. Gordon Wood has more than done justice to these entwined lives and their meaning; he has written a magnificent new addition to America's collective story.

*Planetary Astrobiology* May 15 2022 Are we alone in the universe? How did life arise on our planet? How do we search for life beyond Earth? These profound questions excite and intrigue broad cross sections of science and society. Answering these questions is the province of the emerging, strongly interdisciplinary field of astrobiology. Life is inextricably tied to the formation, chemistry, and evolution of its host world, and multidisciplinary studies of solar system worlds can provide key insights into processes that govern planetary habitability, informing the search for life in our solar system and beyond. Planetary Astrobiology brings together current knowledge across astronomy, biology, geology, physics, chemistry, and related fields, and considers the synergies between studies of solar systems and exoplanets to identify the path needed to advance the exploration of these profound questions. Planetary Astrobiology represents the combined efforts of more than

seventy-five international experts consolidated into twenty chapters and provides an accessible, interdisciplinary gateway for new students and seasoned researchers who wish to learn more about this expanding field. Readers are brought to the frontiers of knowledge in astrobiology via results from the exploration of our own solar system and exoplanetary systems. The overarching goal of Planetary Astrobiology is to enhance and broaden the development of an interdisciplinary approach across the astrobiology, planetary science, and exoplanet communities, enabling a new era of comparative planetology that encompasses conditions and processes for the emergence, evolution, and detection of life.

The CD-ROM packaged with each Manual contains printable copies of each of the book's 45 Staging Forms.

**Descorchados 2018 English** Dec 22 2022 CKB088000 [BISAC]

Transnationalism and German-Language Literature in the Twenty-First Century Nov 28 2020 This book examines how German-language authors have intervened in contemporary debates on the obligation to extend hospitality to asylum seekers, refugees, and migrants; the terrorist threat post-9/11; globalisation and neo-liberalism; the opportunities and anxieties of intensified mobility across borders; and whether transnationalism necessarily implies the end of the nation state and the dawn of a new cosmopolitanism. The book proceeds through a series of close readings of key texts of the last twenty years, with an emphasis on the most recent works. Authors include Terézia Mora, Richard Wagner, Olga Grjasnowa, Marlene Streeruwitz, Vladimir Vertlib, Navid Kermani, Felicitas Hoppe, Daniel Kehlmann, Ilija Trojanow, Christian Kracht, and Christa Wolf, representing the diversity of contemporary German-language writing. Through a careful process of juxtaposition and differentiation, the individual chapters demonstrate that writers of both minority and nonminority backgrounds address transnationalism in ways that certainly vary but which also often overlap in surprising ways.

**Disease Control Priorities, Third Edition (Volume 9)** Aug 30 2023

As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the

elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

**Nutraceuticals in Veterinary Medicine** Jan 11 2022 This unique work compiles the latest knowledge around veterinary nutraceuticals, commonly referred to as dietary supplements, from ingredients to final products in a single source. More than sixty chapters organized in seven sections collate all related aspects of nutraceutical research in animal health and disease, among them many novel topics: common nutraceutical ingredients (Section-I), prebiotics, probiotics, synbiotics, enzymes and antibacterial alternatives (Section-II), applications of nutraceuticals in prevention and treatment of various diseases such as arthritis, periodontitis, diabetes, cognitive dysfunctions, mastitis, wounds, immune disorders, and cancer (Section-III), utilization of nutraceuticals in specific animal species (Section-IV), safety and toxicity evaluation of nutraceuticals and functional foods (Section-V), recent trends in nutraceutical research and product development (Section-VI), as well as regulatory aspects for nutraceuticals (Section-VII). The future of nutraceuticals and functional foods in veterinary medicine seems bright, as novel nutraceuticals will emerge and new uses of old agents will be discovered. International contributors to this book cover a variety of specialties in veterinary medicine, pharmacology, pharmacognosy, toxicology, chemistry, medicinal chemistry, biochemistry, physiology, nutrition, drug development, regulatory frameworks, and the nutraceutical industry. This is a highly informative and carefully presented book, providing scientific insight for academia, veterinarians, governmental and regulatory agencies with an interest in animal

nutrition, complementary veterinary medicine, nutraceutical product development and research.

**Modi and the Reinvention of Indian Foreign Policy** Jul 17 2022

Narendra Modi's energetic personal diplomacy and promise to make India a 'leading power' surprised many analysts. Most had predicted that his government would concentrate on domestic issues, on the growth and development demanded by Indian voters, and that he lacked necessary experience in international relations. Instead, Modi's first term saw a concerted attempt to reinvent Indian foreign policy by replacing inherited understandings of its place in the world with one drawn largely from Hindu nationalist ideology. Following Modi's re-election in 2019, this book explores the drivers of this reinvention, arguing it arose from a combination of elite conviction and electoral calculation, and the impact it has had on India's international relations.

Reflections on Qualitative Research in Language and Literacy Education

Sep 06 2021 This book discusses aspects of the theory and practice of qualitative research in the specific context of language and literacy education. It addresses epistemological perspectives, methodological problems, and practical considerations related to research involvements in areas of language education and literacy studies rather than generic issues of other fields of social sciences. The volume starts with Theoretical Considerations in the first part and raises some epistemological and theoretical concerns that are rarely debated in the specific context of research on language and literacy teaching. The second part, Methodological Approaches explores issues of the design and implementation of language and literacy education research within the framework of some of the major established qualitative research traditions. Finally, the part on Research in Action discusses practical aspects of a few actual instances of qualitative research on language and literacy education in different contexts.

*The Oxford Handbook of Industrial Hubs and Economic Development*

Mar 13 2022 Industrialization supported by industrial hubs has been

widely associated with structural transformation and catch-up. But while the direct economic benefits of industrial hubs are significant, their value lies first and foremost in their contribution as incubators of industrialization, production and technological capability, and innovation. The Oxford Handbook of Industrial Hubs and Economic Development adopts an interdisciplinary approach to examine the conceptual underpinnings, review empirical evidence of regions and economies, and extract pertinent lessons for policy researchers and practitioners on the key drivers of success and failure for industrial hubs. This Handbook illustrates the diverse and complex nature of industrial hubs and shows how they promote industrialization, economic structural transformation, and technological catch-up. It explores the implications of emerging issues and trends such as environmental protection and sustainability, technological advancement, shifts in the global economy, and urbanization.

**Social media and the development of eating disorders among young women. Beauty ideals on Facebook and Instagram** May 27

2023 Document from the year 2020 in the subject Sociology - Gender Studies, , language: English, abstract: Social media such as Facebook or Instagram have become an integral part of our society. For teenagers and young adults in particular, they are an integral part of everyday life. However, social media is no longer just about exchanging information with social contacts. The platforms also serve to present oneself and form opinions about body ideals. It is not uncommon for these ideals of beauty to contribute to distorted body perception and a negative body self-image. As Jacqueline Ammer shows in her publication, young women in particular try to live up to ideals and as a result develop eating disorders. But is this development really related to social networks? Ammer deals with the influence of Facebook and Instagram on the eating behavior of young women aged 15 to 25. Basically, significantly more young women than men suffer from eating disorders, especially between the ages of 15 and 24. In her book, Jacqueline Ammer makes it clear how closely the ideal female body is linked to slimness. From the content: -

obsession with thinness; - diet; - mental health; - self-awareness; - self-esteem
