Its value is in business model thinking. It brings you a combination of the best contributions of academe and industry that will help build business model-centric organizations. Inside, you’ll learn about strategy from a business model perspective. What does that mean? It means that you’ll first have to think rigorously about your value proposition; your current or future competencies; and your revenue streams and cost structure before developing, adopting, or modifying your strategies. What is the difference between a business model and a strategy? A business model is how a company operates, and a strategy is how a company competes. When the basis of competition changes because a new model disrupts the economics in the industry, it requires an adjustment in business models before any new strategy can work. This book adds a business model level to the traditional strategic management process that is more consistent with current “real-world” practices in strategic thinking and analysis. It takes you deeper into the intricacies of what constitutes a business model and how current strategy derives from it, and offers 7 modules that will show you the key components to manage your business model, to help conduct business model analysis, and to assess the financial viability of a business model, just to name a few.
