Advanced Drilling Engineering Apr 29 2023 Drilling technology has advanced immensely in the past 20 years. Directional drilling, rotary steerable drilling and other smart downhole

techniques and tools have progressed past the typical vertical and horizontal well, allowing drilling engineers to design wells of complex geometry and extract energy resources from remote, untapped places. While technology continues to excel, there is a growing need for multidisciplinary information to assist in the design and planning of complex wells. To answer this need, Robello Samuel, with the help of Xiushan Liu, releases a necessary reference titled *Advanced Drilling Engineering*. Samuel and Liu's volume covers full understanding of elaborate drilling processes and engineering well design aspects. Starting with well trajectory and wellbore positioning, they explain well-path planning for directional and extended-reach wells. Other vital topics include collision avoidance, checking for proximity between neighboring wells, downhole survey tools plus MWD/LWD and through bit logging, and intelligent smart well technology, including downhole monitoring tools.

FROM MORO TO BLUFF CREEK Apr 05 2021 Except for

stints as a US Army Airborne Ranger in the jungles of Viet Nam and academia at the University of Texas, the author ' s life remained intertwined within the historical communities of Moro and Bluff Creek, Texas, with their occupants who came for that American dream following the tumultuous aftermath of America ' s Civil War. In this melting pot of family and neighbors, the author grew up and was drafted into the US Army, received an advanced engineering degree, farmed and ranched, designed infrastructure as a professional engineer, became a firefighter and medic, flew planes, played the piano, practiced archaeology, fought the proposed location of a 345 KV transmission line, and successfully raised a family . . . all the while observing from within . . . this once utopian community of Moro, Texas, slowly morph into oblivion. The author analyzes his choices in life among circumstances . . . Was it free choice or simply a reaction to the witches ' brew served, or was it a horse that suddenly appeared and must be ridden?
