Only the correct answers are given, so only the correct answers can be memorized. The rapid-fire question-and-answer format with checkboxes to mark which questions to come back to lends itself to studying alone or with a partner. Every question in this edition has been carefully evaluated to make sure it is completely up-to-date. The new edition addresses four sections of major importance on the boards: General Information; Psychopathology (such as eating disorders and sleep disorders); Special Topics (such as substance abuse and child psychiatry); and Treatment Modalities. The primary intent of this book is to serve as a study aid to improve performance on the EM Written Boards/Recertification or EM Inservice Exam. To achieve this goal the text is written in rapid-fire question/answer format. Misleading or confusing 'foils' are not provided. This eliminates the risk of erroneously assimilating an incorrect piece of information that made a big impression. Questions themselves often contain a pearl intended to be reinforced in association with the question/answer. Additional hooks are often attached to the answer in various forms including mnemonics, evoked visual imagery, repetition and humour. Additional information not requested in the question may be included in the answer. The structure and content of this new edition has been enhanced significantly. The first half of the text is presented in descending order of relative importance on the EM board exam. Information presented in the Pearls Topics sections is mostly limited to straightforward and more basic facts. The second section of the book consists of random pearls -- questions grouped into small clusters by topic presented in no particular order. A round, luminescent pearl is the simplest and most perfect gem. Columbus sought—and found—this precious jewel coveted by his Spanish sovereigns, sparking popularity

throughout Europe. Fashion icons Jacqueline Kennedy, Princess Grace, and Michelle Obama cherished them, making them iconic. And designer Coco Chanel raised them to new heights, bringing pearls— fake and real—to women everywhere. In *Tears of Mermaids*, Stephen G. Bloom travels 30,000 miles in an effort to trace a single pearl—from the moment a diver off the coast of Australia scoops an oyster containing a single luminescent pearl from the ocean floor to the instant a woman fastens the clasp of a strand containing the same orb. Bloom chronicles the never-before-told saga of the global pearl trade by gaining access to clandestine outposts in China, the Philippines, French Polynesia and Australia. He infiltrates high-tech pearl farms guarded by gun-toting sentries, farms for pearls in rural China, and even goes backstage at Christie's for a fast and furious auction of the most expensive pearl ever sold. Teeming with rogue humor and uncanny intelligence, *Tears of Mermaids* weaves a nonstop detective story whose main character is the world's most enduring jewel.

A collection of 30 traditional Syrian and Lebanese folktales infused with new life by Lebanese women, collected by Najla Khoury. While civil war raged in Lebanon, Najla Khoury traveled with a theater troupe, putting on shows in marginal areas where electricity was a luxury, in air raid shelters, Palestinian refugee camps, and isolated villages. Their plays were largely based on oral tales, and she combed the country in search of stories. Many years later, she chose one hundred stories from among the most popular and published them in Arabic in 2014, exactly as she received them, from the mouths of the storytellers who told them as they had heard them when they were children from their parents and grandparents. Out of the hundred stories published in Arabic, Inea Bushnaq and Najla Khoury chose thirty for this book. The primary intent of this book is to serve as a study aid to improve performance on the EM Oral Board Exam. To achieve this goal the text is written in three formats: a topic review, a rapid-fire question/answer format, and actual practice cases. Emphasis has been placed on distilling true trivia and key facts that are easily overlooked, are quickly forgotten, and that somehow seem to be needed on board exams. The first third of the text is presented in a straightforward format with more basic facts. The second section consists of random pathophysiology, procedure, and treatment pearls. The questions are grouped into small clusters by topic presented in no particular order. The random Pearls section repeats much of the factual information contained in the Pearls Topics and builds on this foundation with greater emphasis on linking information and filling in gaps from the Pearls Topics. The final section of the text, Oral Boards Cases, is the most important, as it contains actual practice cases that should be used with your study partner to gain confidence and experience in attacking boards cases. Minimize risk for every surgery-bound patient with this concise, high-yield clinical reference "The accuracy and readability of this [book] is excellent... the writing style is appropriate, informative, and suitable for the primary care clinician. The topics are well researched [and] the clinical recommendations reflect the most current guidelines."—Robert C. Lavender, MD, FACP "The editor and contributing authors are all highly credible authorities and experienced clinicians... This is an extremely well-written, evidence-based text that fills a real gap. It should be useful not only to its intended audience, but also to surgeons and surgical trainees who often provide the initial management of these situations in the absence of consultants."—Doody's Review Service With new surgical advances and innovations, more older, sicker, higher-risk patients are undergoing surgery. Expertly assessing and managing patients with comorbidities who are undergoing surgical procedures is an absolutely critical task today—and Decision Making in Perioperative Medicine: Clinical Pearls will ensure that you make the right decisions through every step of the process. Which risk calculator should you use? How long should you delay surgery after percutaneous coronary intervention? Should the patient continue taking aspirin? How long before surgery should you stop a direct-acting oral anticoagulant? Decision Making in Perioperative Medicine: Clinical Pearls answers your questions when it comes to perioperative care. Filled with algorithms, tables, and clinical pearls, this practical resource is organized into three sections: Key takeaways on preoperative evaluation, testing, anesthesia, and medication management Expert guidance on evaluating the effect of comorbidities on surgical outcome and providing strategies for medical optimization to minimize risk Review of common postoperative medical complications and treatment Whether you're a hospitalist, internist, family physician, anesthesiologist, physician assistant, or nurse practitioner, Decision Making in Perioperative Medicine: Clinical Pearls provides the evidence-based information and insights you need to make sure every surgery-bound patient receives the

A unique tool for teaching and learning the top 100 most teachable topics in internal medicine There are many challenges for residents when training students who are making the big "jump" from preclinical to clinical. Most notably, they need to find time to pick and prepare topics to teach in meaningful ways without the availability of a blackboard in the learning hospital. Students also need to quickly be able to grasp these concepts quickly and with the ability to recall them later. This teaching manual primarily focuses on physiology/pathophysiology/exam findings with the goal of providing content to make teaching and learning on the wards easier for both attendings/senior residents and interns/medical students. It features the 100 most teachable topics (clinical pearls) in an image-based presentation and will cover all the major disciplines of internal medicine, including cardiology, gastroenterology, endocrine, and infectious disease. Each topic, or card, has an image on one side to prompt discussion (ECG, CXR, physical exam finding, etc.), and the flip side includes teaching points organized in question and answer format. They are presented in a pocket-sized binder with removable cards so both residents and students can remove only the topics of the day or ones they need to study.
