Supportive Care for the Person with Dementia Feb 11 2022 Supportive Care for the person with dementia provides a broad and full perspective, drawing upon the experience and expertise of a wide range of internationally-based professionals to outline a model of supportive care that will provide good quality and holistic care for people with dementia.

Emergencies in Palliative and Supportive Care Sep 20 2022 This essential handbook provides a practical, accessible guide to emergency situations encountered in palliative care practice. Using a system of icons, and structured around frequently encountered symptoms, it is split into two sections. The first section explores how patients with life-limiting illnesses such as cancer, AIDS, and end-stage organ failure normally present, and looks at the reversibility of their condition. The second section provides a detailed approach to specific clinical conditions, and is for use once the clinical diagnosis has been reached on the basis of the presenting symptoms. The book will provide trainees in palliative medicine, nurses, family doctors, and other allied health professionals with a pocket guide to the emergency care of people requiring palliative and supportive care, and will complement the Oxford Handbook of Palliative Care.

Principles and Practice of Supportive Oncology Sep 28 2020 Text on the elements of palliative care that are most applicable to the care of cancer patients.

Handbook of Supportive and Palliative Radiation Oncology Aug 08 2021 Handbook of Supportive and Palliative Radiation Oncology serves as a practical tool and rapid reference to assist radiation oncology practitioners in direct patient care with common palliative care issues. Containing the most recent advances in translational palliative care research, each chapter is organized in a succinct fashion to discuss major symptom burdens, suggested assessment, and various management options. Each symptom and disease section is written to be a rapid, practical guide for clinicians on the floor. The book starts with general approaches in palliative radiation

oncology that are followed by a section that focuses on common symptoms in palliative care and their management. The next section of the book is devoted to site and disease-specific evaluation, intervention, and management. This handbook provides general guidelines and management recommendations for common clinical vignettes encountered by palliative radiation oncology practitioners and supported by palliative radiation oncology research. Concise references are cited to support treatment recommendation. Provides a quick reference for the busy clinician Details standard of care resources for researchers of palliative and supportive care Contains updated standards of care for palliative medicine and a list of common medications and dosages Includes a comprehensive index by symptom and condition to facilitate quick reference

Comprehensive Guide to Supportive and Palliative Care for Patients with Cancer Apr 27 2023 "The contributors educate health care providers on the principles and practices of pain and symptom management in cancer patients. The content was expanded significantly for the fourth edition"--

Handbook of Supportive Oncology and Palliative Care Apr 15 2022 Handbook of Supportive Oncology and Palliative Care is a practical guide to providing evidence-based and value-based care to adult and pediatric cancer patients experiencing severe symptoms and stressors due to cancer diagnosis, cancer treatment, and comorbid conditions. This accessible reference provides the art and science behind the whole-person and family approach to care by delivering the best practices to relieving a cancer patient's symptoms across physical, psychosocial, and spiritual dimensions. Unlike other resources, this book covers all dimensions of palliative care but with a special emphasis on primary palliative care. Part One of the handbook provides the essential background and principles of supportive oncology and palliative care, including chapters on understanding the adult and pediatric patient and family illness experience, the roles and responsibilities of the palliative care team, and the art of the palliative care assessment interview. Part Two covers symptom management and includes ten chapters considering the major physical and psychosocial symptoms a cancer patient may face—neurologic, cardiac, respiratory, gastrointestinal, genitourinary, psychiatric, sleep and fatigue, pain, and psychosocial and spiritual distress. Part Three addresses special considerations and issues that an oncologist, physician, nurse or other healthcare provider often face in these settings, including chapters on intimacy, sexuality, and fertility issues, grief and bereavement, running a family meeting, care for the caregiver, and survivorship. Written by expert clinicians, this state-of-the-art handbook is a necessary resource for any oncologist, nurse, primary care physician, psychosocial expert, or related practitioner who endeavors to improve quality of life and provide healing to those suffering from cancer and its treatment. Key Features: Provides the binding principles of palliative care for pediatrics, adults and families from diverse cultures and spiritual beliefs Easy-to-read format makes extracting content fast and convenient for both the clinical and educational setting Guides the clinician and practitioner through the palliative care assessment process, including the appropriate questions for the palliative care interview *Oxford American Handbook of Hospice and Palliative Medicine and Supportive Care* Dec 24 2022 Preceded by Oxford American handbook of hospice and palliative medicine / edited by Eduardo Bruera, Sriram Yennurajalingam. 2011.

Practical Medical Oncology Textbook May 05 2021 This textbook combines essential information on clinical cancer medicine with a guide to the latest advances in molecular oncology and tumor biology. Providing a systematic overview of all types of solid tumors, including epidemiology and cancer prevention, genetic aspects of hereditary cancers, differential diagnosis, typical signs and symptoms, diagnostic strategies and staging, and treatment modalities, it also discusses new and innovative cancer treatments, particularly targeted therapy and immunotherapy. Expert commentaries at the end of each chapter highlight key points, offer insights, suggest further reading and discuss clinical application using case descriptions. This textbook is an invaluable, practice-oriented tool for medical students just beginning their clinical oncology studies, as well as for medical oncology residents and young professionals.

Supporting the Child and the Family in Paediatric Palliative Care Mar 15 2022 Supporting the

Child and the Family in Paediatric Palliative Care provides a comprehensive overview of good practice in caring for terminally-ill children, young people and their families. Drawing from extensive personal experiences of working in paediatric palliative care, the author provides guidance on issues including symptom management and pain relief; cultural, religious and spiritual aspects of care; and the role of education for life-limited children. Addressing the importance of individual needs, the book looks at emotional, social and cognitive support at different stages of the illness, how parents and professionals can respond to children's own questions about death, and the impact of life-limiting illness on the whole family - including grandparents and siblings. The material offers helpful suggestions on how to support families in making informed choices during distressing periods, such as where their child will die and how to prepare for the funeral. This book is a practical and invaluable tool for nurses, paediatricians, hospice care staff, bereavement counsellors and all those caring for life-limited children.

Supportive Care in Cancer Patients Jul 07 2021 The symposium on supportive care in cancer patients, which took place in St. Gallen, Switzerland, on February 18-21, 1987, welcomed renowned experts in the field and more than 600 participants from 25 countries with the aim of stimulating discussion on how to improve our professional skills and personal attitudes to ward cancer patients in all stages of their disease. Why did we organize such a symposium on supportive care in cancer patients? Recent decades have witnessed remarkable success in cancer treatment, and we have learned how to cure a finite number of neoplastic diseases. Some malignant tumors that previously entailed high fatality rates, such as leukemias, lymphomas, and testicular cancers, can now be cured, even when at an advanced stage. Yet it seems to many that our struggle to improve results and to fight death from cancer has also imposed greater toxicity on patients. Conventional scientifically based oncology has only recently made adequate efforts to improve the subjective quality of life of cancer patients, for example through prophylaxis against emesis, nausea, and scalp hypothermia, pain control and the development of psychosocial support structures. The search for less toxic and yet equally effective treatment measures has not been one of our primary goals in the past. Supportive care has always been part of nurses' professional aim, even though many have not known how best to offer it.

Oxford American Handbook of Hospice and Palliative Medicine and Supportive Care Jun 05 2021 The Oxford American Handbook of Hospice and Palliative Medicine and Supportive Care is an easily-navigable source of information about the day-to-day management of patients requiring palliative and hospice care. The table of contents follows the core curriculum of the American Board of Hospice and Palliative Medicine, thus meeting the educational and clinical information needs of students, residents, fellows, and nurse practitioners. Succinct, evidence-based, topically-focused content is supplemented by extensive tables, algorithms, and clinical pearls. This edition includes new sections on grief and bereavement, medical marijuana, and physician assisted suicide, and has been updated throughout to incorporate National Consensus Project for Quality Palliative Care Clinical Practice Guidelines.

Geriatric Palliative Care Dec 12 2021 Geriatric Palliative Care covers a broad spectrum of issues characterizing care near the end of life for older adults. Beginning with the social and cultural context of old age and frailty, this volume details specific aspects of palliative care relevant to particular disorders (e.g. cancer, strokes, dementia, etc.) as well as individual symptoms (e.g., pain, fatigue, anxiety, etc.). Communication between care-givers and patients, in a variety of settings, is also discussed. The theme of this book is that palliative care is the best approach to the care of chronically ill and frail elderly because of its focus on: quality of life; support for functional independence; and the centrality of the patient's values and experiences in determining the goals of medical care. Indeed, Geriatric Palliative Care provides a comprehensive medical reference for all clinicians who care for older adults.

Interventional Radiology in Palliative Care Apr 23 2020 This important book fills a gap in the literature by focusing specifically on the role of interventional radiology in patients receiving palliative medicine and supportive care, a group in which the need for minimally invasive therapy is

especially high. Detailed information and guidance is provided on use of the tools of interventional radiology for the purpose of problem solving in relation to a wide variety of diseases and complications. Readers will find clear explanation of the ways in which interventional radiology techniques can assist with regard to intravenous access, feeding, musculoskeletal and neurological pain relief, tumor debulking, management of bleeding and obstructions, drainages, and treatment of fistulas. Throughout, helpful tips and tricks of value in daily practice are highlighted. The book is an ideal reference on the interventional management of palliative/supportive care and the effective use of interventional radiology techniques in a multidisciplinary environment. Beyond specialists and trainees in interventional radiology, it will have broad appeal to all who deal with patients on palliative and supportive care on a day-to-day basis.

Principles and Practice of Palliative Care and Supportive Oncology Feb 23 2023 The first truly interdisciplinary book on supportive oncology and palliative care returns with a new edition that serves as a practical guide to the management of the myriad symptoms and quality-of-life issues that occur in patients with cancer—including newly diagnosed patients, patients undergoing treatment, cancer survivors, and patients whose disease is no longer curable. The interdisciplinary group of contributors includes leading experts in hospice care and palliative medicine, oncology, nursing, neurology, psychiatry, anesthesiology, and pharmacology. This completely revised edition features new chapters on caregiver stress, hepatic failure, pulmonary failure, research issues in palliative care, and beginning a palliative care program. Content has been aligned with the needs of today's palliative care fellowship programs and includes additional tables, algorithms, and flow charts.

Supportive Oncology E-Book May 17 2022 Supportive Oncology, by Drs. Davis, Feyer, Ortner, and Zimmermann, is your practical guide to improving your patients' quality of life and overall outcomes by integrating palliative care principles into the scope of clinical oncologic practice at all points along their illness trajectories. A multidisciplinary editorial team, representing the dual perspectives of palliative medicine and oncology, offers expert guidance on how to effectively communicate diagnoses and prognoses with cancer patients and their families, set treatment goals, and manage symptoms through pharmacological therapies, as well as non-pharmacological therapies and counselling when appropriate. Integrate complementary palliative principles as early as possible after diagnosis with guidance from a multidisciplinary editorial team whose different perspectives and collaboration provide a well-balanced approach. Effectively communicate diagnoses and prognoses with cancer patients and their families, set treatment goals, and manage symptoms through pharmacological therapies, as well as non-pharmacological therapies and counseling when appropriate. Improve patients' quality of life with the latest information on pain and symptom management including managing side effects of chemotherapy and radiotherapy, rehabilitating and counselling long-term survivors, and managing tumor-related symptoms and other complications in the palliative care setting. Prescribe the most effective medications, manage toxicities, and deal with high symptom burdens.

Textbook of Palliative Medicine Jan 25 2023 Textbook of Palliative Medicine provides an alternative, truly international approach to this rapidly growing specialty. This textbook fills a niche with its evidence-based, multi-professional approach and global perspective ensured by the international team of editors and contributing authors. In the absence of an international curriculum for the study of palliative medicine, this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field, and the structure and content have been constructed very much with this in mind. With an emphasis on providing a service anywhere in the world, including the important issue of palliative care in the developing nations, Textbook of Palliative Medicine offers a genuine alternative to the narrative approach of its competitors, and is an ideal complement to them. It is essential reading for all palliative care physicians in training and in practice, as well as palliative care nurses and other health professionals in the palliative care team

Cohort Studies in Health Sciences Jul 27 2020

Palliative Medicine Jan 30 2021 This revised and updated edition of Palliative Medicine is about the

care of patients with advanced cancer and AIDS. While the primary focus is the treatment of pain and other medical problems experienced by patients, the importance of psychosocial and non-physical aspects of suffering, and the need for a holistic and multidisciplinary approach to care, are stressed. The principles of palliative care are discussed, as are ethical issues such as physician-assisted suicide and euthanasia. The section on HIV infection and AIDS has been expanded with particular emphasis on the gastroenterological and neuropsychiatric features associated with this illness.

Handbook of Supportive Oncology and Palliative Care Mar 27 2023 *Handbook of Supportive Oncology and Palliative Care* is a practical guide to providing evidence-based and value-based care to adult and pediatric cancer patients experiencing severe symptoms and stressors due to cancer diagnosis, cancer treatment, and comorbid conditions. This accessible reference provides the art and science behind the whole-person and family approach to care by delivering the best practices to relieving a cancer patient's symptoms across physical, psychosocial, and spiritual dimensions. Unlike other resources, this book covers all dimensions of palliative care but with a special emphasis on primary palliative care. Part One of the handbook provides the essential background and principles of supportive oncology and palliative care, including chapters on understanding the adult and pediatric patient and family illness experience, the roles and responsibilities of the palliative care team, and the art of the palliative care assessment interview. Part Two covers symptom management and includes ten chapters considering the major physical and psychosocial symptoms a cancer patient may face--neurologic, cardiac, respiratory, gastrointestinal, genitourinary, psychiatric, sleep and fatigue, pain, and psychosocial and spiritual distress. Part Three addresses special considerations and issues that an oncologist, physician, nurse or other healthcare provider often face in these settings, including chapters on intimacy, sexuality, and fertility issues, grief and bereavement, running a family meeting, care for the caregiver, and survivorship. Written by expert clinicians, this state-of-the-art handbook is a necessary resource for any oncologist, nurse, primary care physician, psychosocial expert, or related practitioner who endeavors to improve quality of life and provide healing to those suffering from cancer and its treatment. Key Features: Provides the binding principles of palliative care for pediatrics, adults and families from diverse cultures and spiritual beliefs Easy-to-read format makes extracting content fast and convenient for both the clinical and educational setting Guides the clinician and practitioner through the palliative care assessment process, including the appropriate questions for the palliative care interview Interdisciplinary team approach to psychosocial and spiritual care Includes access to the fully searchable downloadable eBook

Palliative Medicine Jan 01 2021 "While the primary focus is on the treatment of pain and other medical problems, the importance of psychosocial and nonphysical aspects of suffering, and the need for a holistic, and multidisciplinary approach to care, are stressed. The principles underlying good palliative care are discussed, as are ethical issues such as physician-assisted suicide and euthanasia." "This fourth edition is extensively referenced. The results of hundreds of randomised controlled trials, as well as systematic and Cochrane reviews, are highlighted as palliative medicine moves into the era of evidence-based medicine."--Jacket.

MD Anderson's Guide to Supportive and Palliative Care for Nurses Nov 10 2021 Since 1999, nurses at The University of Texas MD Anderson Cancer Center have played key roles on the palliative care interdisciplinary team, which includes a mobile consultation team, an ambulatory outpatient center, and a dedicated acute inpatient palliative care unit. Passionate about continuing the development of evidence-based palliative care, the second edition of this handbook is intended to serve as a guide for healthcare providers in palliative medicine, along with referring physicians and nurses. This second edition includes input from nurses, physicians, social workers, chaplains, occupational and physical therapists, and pharmacists to provide guidance on the best practices to successfully work as an interdisciplinary team to deliver the optimal care to palliative care patients.

Principles and Practice of Palliative Care and Supportive Oncology Jul 31 2023 Unlike other textbooks on this subject, which are more focused on end of life, the 4th edition of *Principles and*

Practice of Palliative Care and Supportive Oncology focuses on supportive oncology. In fact, the goal of this textbook is to provide a source of both help and inspiration to all those who care for patients with cancer. Written in a more reader-friendly format, this textbook not only offers authoritative and up-to-date reviews of research and clinical care best practices, but also practical clinical applications to help readers put everything they learn to use.

Hospice and Palliative Medicine and Supportive Care Flashcards May 29 2023 Hospice and Palliative Medicine and Supportive Care Flashcards is a comprehensive, evidence-based book of flashcards for clinicians caring for patients who require hospice and palliative care and supportive care. Written in a clinical scenario/vignette, question and answer format by experts with first-hand experience in the field, the flashcards are highly readable and serve as a source of fast answers to clinical questions in the field. A total of 300 flashcards are organized into chapters by symptom/disease and provide readers with up-to-date information that follow the core curriculum of American Board of Hospice and Palliative Medicine for ease of use and rapid review for exams. This book will equip care professionals with key concepts related to the assessment and management of palliative care, making it an ideal point-of-care quick reference material for physicians, nurse practitioners, fellows, residents, and students.

Palliative Medicine Oct 10 2021 Guide to the practice of palliative care for patients with advanced cancer and AIDS. Care is prescribed in detail for different symptoms and complications as well as support for the psychological, social, cultural and spiritual suffering of patients. Includes index and bibliography. Author is senior medical oncologist at the Austin Hospital.

Supportive and Palliative Care in Cancer Jun 17 2022 This book provides a clear approach to establishing a user involvement system in a healthcare organisation and its potential impact on cancer services. Using a tool kit style approach drawing on examples of successful past projects and case studies to provide evidence of good practice it describes how to plan and implement different stages of user involvement enabling organisations to draw on user experience and expertise to evaluate develop and improve the quality of service that they provide. Members of regional cancer networks multidisciplinary cancer care teams and all those involved in the NHS cancer services will find this toolkit interesting reading.

Issues in Supportive Care of Cancer Patients May 24 2020

The Comprehensive Cancer Center Apr 03 2021 This open access book provides a valuable resource for hospitals, institutions, and health authorities worldwide in their plans to set up and develop comprehensive cancer care centers. The development and implementation of a comprehensive cancer program allows for a systematic approach to evidence-based strategies of prevention, early detection, diagnosis, treatment, and palliation. Comprehensive cancer programs also provide a nexus for the running of clinical trials and implementation of novel cancer therapies with the overall aim of optimizing comprehensive and holistic care of cancer patients and providing them with the best opportunity to improve quality of life and overall survival. This book's self-contained chapter format aims to reinforce the critical importance of comprehensive cancer care centers while providing a practical guide for the essential components needed to achieve them, such as operational considerations, guidelines for best clinical inpatient and outpatient care, and research and quality management structures. Intended to be wide-ranging and applicable at a global level for both high and low income countries, this book is also instructive for regions with limited resources. *The Comprehensive Cancer Center: Development, Integration, and Implementation* is an essential resource for oncology physicians including hematologists, medical oncologists, radiation oncologists, surgical oncologists, and oncology nurses as well as hospitals, health departments, university authorities, governments and legislators.

Palliative Care in Nephrology Oct 29 2020 "Kidney Palliative (Supportive) Care is a field that has been in existence since at least 2000 but has yet to gain solid traction in terms of integration into nephrology practice or consistent visibility in publications and professional meetings. This is beginning to change. A search of PubMed for "Kidney AND Palliative Care" reveals over 1,300 articles with the majority having been written in the last 10 years with a particular upsurge in the

last five years"--

Supportive Care for the Renal Patient Mar 03 2021 Supportive Care for the Renal Patient Second Edition provides a comprehensive, evidence-based overview of supportive care for the nephrology patient. An international group of contributors emphasise the continuum of palliative care from the time of diagnosis through to end-of-life care and the issues surrounding withdrawal of dialysis. The book addresses the psychological impact of the disease, the importance of involving the patient in making decisions about their care, ethical considerations, the role of the family and the multidisciplinary team. This new edition includes two new chapters on conservative management of advanced kidney disease (AKD) and dialysis in the very elderly. The chapters covering non pain symptoms, advance care planning, quality of life, psychological and psychiatric consideration and end-of-life care have also be completely revised to include new evidence and current thinking. This book will be of particular interest to palliative care practitioners; nephrologists, who increasingly need to know more about palliative care; nurse practitioners, dialysis nurses, social workers, dieticians, and psychiatric consultants. ABOUT THE SUPPORTIVE CARE SERIES Supportive care is the multidisciplinary holistic care of patients with chronic and life-limiting illnesses and their families - from the time around diagnosis, through treatments aimed at cure or prolonging life, and into the phase currently acknowledged as palliative care. It involves recognising and caring for the side-effects of active therapies as well as patients' symptoms, co-morbidities, psychological, social and spiritual concerns. It also values the role of family carers and helps them in supporting the patient, as well as attending to their own special needs. Unlike traditional palliative care, which grew from the terminal care of cancer patients, supportive care is not restricted to dying patients nor to cancer. This series covers the support of patients with a variety of long-term conditions, who are currently largely managed by specialist medical teams in hospital and by primary care teams in community settings. Each volume therefore provides a practical guide to the supportive care of patients at all stages of illness. Series Editor: Sam H. Ahmedzai

Principles and Practice of Palliative Care and Support Oncology Jan 13 2022 The only book on the market to cover palliative care for both adults and children, Pediatric and Adult Palliative Care and Support Oncology offers an easy-to-read, interdisciplinary approach to supportive oncology as well as end-of-life care. Ideal for oncologists, residents, fellows, nurse practitioners, and physician assistants, the fifth edition has a new title, a more compact size, fully revised content, and a new focus on quick-reference features throughout. Covering everything from dermatologic toxicity of cancer treatment to running family meetings for setting goals of care, this unique title is a source of both help and inspiration to all those who care for patients with cancer.

Supportive and Palliative Care and Quality of Life in Oncology Aug 27 2020 This book examines supportive and palliative care and quality of life in cancer patients. Chapters address such topics as anxiety, depression, and delirium in terminally ill cancer patients, ethics in palliative care, palliative care medications, assisted suicide and euthanasia, and much more.

Clinical Manual of Palliative Care Psychiatry Jun 25 2020 In recent years, palliative care has emerged as the leading model of person-centered care focused on preserving quality of life and alleviating distress for people and families experiencing serious and life-limiting medical illness. Alongside this development has come a growing recognition of the need for expertise in psychiatric diagnosis, psychopharmacology, and psychotherapy within the interdisciplinary team of specialists tasked with identifying and addressing the varied sources of suffering in patients with advanced medical illnesses. The Clinical Manual of Palliative Care Psychiatry was written to motivate and guide readers -- whether mental health clinicians or palliative care providers -- to deepen their understanding of the psychosocial dimensions of suffering for the benefit of seriously ill patients and the support of their families. Great care has been exercised in the choice of topics and features: Chapter content emphasizes practical aspects of assessment and management that are unique to the palliative care setting, ensuring that clinicians are equipped to address the most common challenges they are likely to face. Each chapter ends with a list of supplemental materials -- including key publications (e.g., "Fast Facts" from the Center to Advance Palliative Care) and links to relevant

modules from the Education in Palliative and End-of-Life Care curriculum (e.g., EPEC for Oncology) - aimed at extending and enhancing reader knowledge of the topics covered. The authors provide thorough coverage of medication use, including off-label applications, which are common in palliative care. A wealth of tables and figures present clinically relevant information in a concise and easy-to-grasp manner. Practical and brimming with essential information and useful techniques, the Clinical Manual of Palliative Care Psychiatry empowers both mental health clinicians and palliative care practitioners to more skillfully respond to psychosocial suffering in seriously ill and dying patients.

Palliative Care in Oncology Jul 19 2022 Palliative care provides comprehensive support for severely affected patients with any life-limiting or life-threatening diagnosis. To do this effectively, it requires a disease-specific approach as the patients' needs and clinical context will vary depending on the underlying diagnosis. Experts in the field of palliative care and oncology describe in detail the needs of patients with advanced cancer in comparison to those with non-cancer disease and also identify the requirements of patients with different cancer entities. Basic principles of symptom control are explained, with careful attention to therapy for pain associated with either the cancer or its treatment and to symptom-guided antineoplastic therapy. Complex therapeutic strategies for palliative cancer patients are highlighted that involve both cancer- and symptom-directed options and address a range of therapeutic aims. Issues relating to drug use in palliative cancer care are fully explored, and a separate section is devoted to care in the final phase. A range of organizational and policy issues are also discussed, and the book concludes by considering likely future developments in palliative care for cancer patients. Palliative Care in Oncology will be of particular interest to palliative care physicians who are interested in broadening the scope of their disease-specific knowledge, as well as to oncologists who wish to learn more about modern palliative care concepts relevant to their day-to-day work with cancer patients.

Supportive Care in Cancer Patients II Sep 08 2021 The second international symposium on "Supportive Care in Cancer Patients" took place March 1-3, 1990-again in St. Gallen in eastern Switzerland. It was an honor once more to welcome dozens of internationally recognized experts in the field and more than 800 participants from over 30 countries around the world: Australia, Canada, China, USSR, USA and many countries in Europe. The international nature of the grade facilitated lively and exciting contributions and critical discussions, aimed at fostering professional knowledge and skills and rethinking our personal attitudes toward cancer patients in all stages of their disease. Cancer patients need various types of tailored support, whether during active initial (curative) therapies, in phases of worrying relapsing disease, or during the demanding terminal stage of their illness. The symposium tried to bridge the strange "gap" between "curative" and "palliative" cancer care: it must be our aim to be and remain "supportive" for our patients during both curative and palliative treatment strategies! This requires extended knowledge and even more and flexible professional skills. The symposium was designed to promote improved approaches that are helpful and supportive for all our oncology patients, not just for a selected disease-or stage dependent minority.

Principles and Practice of Palliative Care and Support Oncology Nov 22 2022 The only book on the market to cover palliative care for both adults and children, Pediatric and Adult Palliative Care and Support Oncology offers an easy-to-read, interdisciplinary approach to supportive oncology as well as end-of-life care. Ideal for oncologists, residents, fellows, nurse practitioners, and physician assistants, the fifth edition provides important updates for conventional topics while also featuring several brand new chapters. Covering everything from dermatologic toxicity of cancer treatment to running family meetings for setting goals of care, this unique title is a source of both help and inspiration to all those who care for patients with cancer.

Textbook of Palliative Medicine and Supportive Care Sep 01 2023 "the thoroughness of the text has to be admired. It is an excellent starting point for students of palliative care which makes an important contribution to any library."-British Journal of Hospital Medicine" covers a plethora of topics ranging from the development of palliative medicine in different countries to clinical topics

and bioethics an

Cancer in Context Nov 30 2020 This book offers healthcare professionals, academics and anyone affected by cancer a fresh and original approach to the supportive care of people with cancer. It looks at some of the underlying reasons why cancer often leads to high levels of distress. More importantly, it suggests many practical ways distress can be prevented and minimised. The book combines the actual experiences of cancer patients, as recorded in their personal diaries, with theory, research and practical clinical advice. In each of its seven chapters the book takes a different perspective and a different approach to supportive care in cancer. Chapter 1 considers how people generally manage and adjust to change in their lives and in particular how they react to the threat of cancer. Chapter 2 examines the 'lived experience' of people with cancer as they negotiate the many challenges and changes following their diagnosis. Chapter 3 looks at the impact of cancer on the families, partners, and carers of people with cancer. Chapter 4 shows that the social and cultural context of someone's life is critical to an understanding of their resources and responses to serious illness. Chapter 5 considers how professionals can help minimise disruption to their patients quality of life as they endure the notorious demands of oncology treatments. It looks at popular cancer treatments, common treatment difficulties, cancer rehabilitation and palliative care. Chapter 6 provides a summary of the burgeoning area of communication skills within healthcare and, finally, Chapter 7 ponders how professionals can maintain adequate supportive care in light of the evidence of high levels of stress and burnout among cancer staff.

Textbook of Palliative Medicine and Supportive Care Jun 29 2023 This new edition provides the essential clinical guidance both for those embarking upon a career in palliative medicine and for those already established in the field. A team of international experts here distil what every practitioner needs to know into a practical and reliable resource.

ESMO Handbook Oct 22 2022 First published in 2010. Routledge is an imprint of Taylor & Francis, an informa company.

Hospice Palliative Home Care and Bereavement Support Aug 20 2022 This book provides an unique resource for registered nurses working in hospice palliative care at home and for the community, outside of acute care settings and also incorporates literature related to palliative care in acute health care settings, as part of the overall services and supports required. Very few resources exist which specifically address hospice palliative care in the home setting, despite the fact that most palliative care occurs outside acute care settings and is primarily supported by unpaid family caregivers. An overview of the concerns for individuals and families, as well as specific nursing interventions, from all ages would be an excellent support for nursing students and practicing registered nurses alike. The book structure begins with a description of the goals and objectives of hospice palliative care and the nursing role in providing excellent supportive care. Chapters include research findings and specifically research completed by the authors in the areas of pediatric palliative care, palliative care for those with dementia, and the needs of family caregivers in bereavement. Interventions developed by the editors are provided in this book, such as the "Finding Balance Intervention" for bereaved caregivers; the "Reclaiming Yourself" tool for bereaved spouses of partners with dementia; and The Keeping Hope Possible Toolkit for families of children with life threatening and life limiting illnesses. The development and application of these theory-based interventions are also highlighted. Videos and vignettes written by family caregivers about what was helpful for them, provide a patient-and family-centered approach./div The book will benefit nursing students, educators and practicing registered nurses by providing information, theory, and evidence from research.
