Robert Kirkman Jan 15 2022 Robert Kirkman (b. 1978) is probably best known as the creator of The Walking Dead. The comic book and its television adaptation have reinvented the zombie horror story, transforming it from cult curiosity and parody to mainstream popularity and critical acclaim. In some ways, this would be enough to justify this career-spanning collection of interviews. Yet Kirkman represents much more than this single comic book title. Kirkman's story is a fanboy's dream that begins

with him financing his irreverent, independent comic book *Battle Pope* with credit cards. After writing major titles with Marvel comics (*Spider-Man*, *Captain America*, and *X-Men*), Kirkman rejected companies like DC and Marvel and publicly advocated for creator ownership as the future of the comics industry. As a partner at Image, Kirkman wrote not only *The Walking Dead* but also *Invincible*, a radical reinvention of the superhero genre. *Robert Kirkman: Conversations* gives insight to his journey and explores technique, creativity, collaboration, and the business of comics as a multimedia phenomenon. For instance, while continuing to write genre-based comics in titles like *Outcast* and *Oblivion Song*, Kirkman explains his writerly bias for complex characters over traditional plot development. As a fan-turned-creator, Kirkman reveals a creator's complex relationship with fans in a comic-con era that breaks down the consumer/producer dichotomy. And after rejecting company-ownership practices, Kirkman articulates a vision of the creator-ownership model and his goal of organic creativity at Skybound, his multimedia company. While Stan Lee was the most prominent comic book everyman of the previous era of comics production, Kirkman is the most prominent comic book everyman of this dynamic, evolving new era.

**Script-Based Semantics** Mar 29 2023 The book contains essays in honor of Victor Raskin. The contributions are all directly related to some of the major areas of work in which Raskin's scholarship has spanned for decades. The obvious connecting idea is the encyclopedic script-based foundation of lexical meaning, which informs his pioneering work in semantics in the 1970s and 1980s. The first part of the book collects articles directly concerned with script-based semantics, which examine both the theoretical and methodological premises of the idea and its applications. Script-based semantics is the foundation of both Raskin's ground-breaking work in humor research (addressed by the articles in part 2) and in Ontological semantics (addressed in part 3), the most recent development of script-based semantics. The fourth part is dedicated to a less-known, but equally important, strand of Raskin's research, the applications of linguistics to other fields, including writing, lexicography, and professional applications (e.g., tourism). Overall, the book provides an up-to-date, in-depth discussion of an influential strand of the discussion on semantics and its most recent developments and influence on other seemingly unrelated fields, such as Cognitive Linguistics.
