Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users. This volume provides an up-to-date and evaluative review of theoretical and empirical stances on emotion and its close interaction with language and cognition in monolingual and bilingual individuals. Importantly, it presents a novel methodological approach that takes into account contextual information and hence goes beyond the reductionist approach to affective language that has dominated contemporary research. Owing to this pragmatic approach, the book presents brand new findings in the field of bilingualism and affect and offers the first neurocognitive interpretation of findings reported in clinical and introspective studies in bilingualism. This not only represents an invaluable contribution to the literature, but may also constitute a breakthrough in the investigation of the worldwide phenomenon of bilingualism. Beginning with a thorough review of the history and current state of affective research and its relation to language, spanning philosophical, psychological, neuroscientific, and linguistic perspectives, the volume then proceeds to explore affect manifestation using neuropragmatic methods in monolingual and bilingual individuals. In doing so, it brings together findings from clinical and introspective studies in bilingualism with cognitive, psychophysiological and neuroimaging paradigms. By combining conceptual understanding and methodological expertise from many disciplines, this volume provides a comprehensive

picture of the dynamic interactions between contextual and affective information in the language domain. Thus, *Affect-Language Interactions in Native and Non-Native English Speakers: A Neuropragmatic Perspective* fosters a pragmatic approach to research on affective language processing in monolingual and bilingual population, one that builds bridges across disciplines and sparks important new questions in the cognitive neuroscience of bi- and multilingualism. The papers comprising this volume focus on a broad range of acquisition phenomena (subject dislocation, structural case, word order, determiners, pronouns, quantifiers and logical words) from different languages and language combinations. These include languages with large numbers of speakers (French, German, Spanish) and less frequently spoken ones (Norwegian, Russian, Swiss-German, Hebrew, Basque and Serbo-Croatian) within different language acquisition scenarios and a wide range of populations. Most contributions adopt a common theoretical background within the generative approach with the aim to advance, discuss and critically analyse other research on first, bilingual and language impaired acquisition. The various sections of this stimulating volume reflect different theoretical and methodological perspectives of current research investigating morphology and syntax and offer diverging interpretations. This book is about the close historical and linguistic relationship between the languages of Surinam and Benin, a relationship which can be viewed in terms of a Trans Atlantic Sprachbund or linguistic area. It consists of a detailed analysis of various possible substrate and adstrate effects in a number of components of the grammar, in the Surinam Creole languages, primarily from the Gbe languages of Benin but also from Kikongo. This book investigates the role and significance that examples play in shaping arguments and thought, both in philosophy and in everyday life. It addresses questions about how our moral thinking is informed by our conceptual practices, especially in ways related to the relationship between ethics and literature, post-Wittgensteinian ethics, or meta-philosophical concerns about the style of philosophical writing. Written in an accessible and non-technical style, the book uses examples from real-life events or pieces of well-known fictional stories to introduce its discussions. In doing so, it demonstrates the complex way examples, rather than exemplifying philosophical points, inform and condition how we approach the points for which we want to argue. The author shows how examples guide or block our understanding in certain directions, how they do this by stressing morally relevant aspects or dimensions of the terms, and how the sense of moral seriousness allows us to learn from examples. The final chapter explores whether these kinds of engagement with examples can be understood as "thinking primarily through examples." Examples and Their Role in Our Thinking will be of interest to scholars and graduate students working in ethics and moral philosophy, philosophy of language, and philosophy of literature. Making pragmatics accessible to a wide range of students and instructors without dumbing down the content of the field, this text for language professionals: raises awareness and increases knowledge and understanding of how human beings use language in real situations to engage in social action fosters the ability to think critically about language data and use helps readers develop the ability to "do pragmatics" The book features careful explanations of topics and concepts that are often difficult for uninitiated readers, a wealth of examples, mostly of natural speech from collected data sources, and attention to the needs of readers who are non-native speakers of English, with non-Western perspectives offered when possible. Suggested Readings, Tasks, Discussion Questions, and Data Analysis sections involve readers in extending and applying what they are reading. The exercises push readers to recall and synthesize the content, elicit relevant personal experiences and other sources of information, and engage in changing their own interactional strategies. The activities go beyond a predictable framework to invite readers to carry out real life observations and experiment to make doing pragmatics a nonjudgmental everyday practice. The West has always been a resource for the Finns. Scholars, artists and other professionals have sought contacts from Europe throughout the centuries. The Finnish experience in Western Europe and the New World is a story of migrant laborers, expatriates and specialists working abroad. But you don't have to be born in Finland to be a Finn. The experiences of second-generation Finnish immigrants and their descendants open up new possibilities for understanding the relationship between Finland and the West. The Finnish passage westward has not always crossed national borders. Karelian evacuees headed west, as did young people from the Finnish countryside when opportunities to make a living in agriculture and forestry diminished in the post-war era. The legacy of these migrants is still visible in the suburbs of Finnish cities today. This book is a joint effort of the Department of Ethnology and the Department of History at the University of Helsinki. It was written by Ph. D. students supervised by Academy Research Fellows Maria Lähteenmäki and Hanna Snellman, in collaboration with colleagues abroad interested in current research in ethnology and history. This book describes a theory-guided approach to Foreign Language (FL) course development, implementation, instruction and assessment. It documents the development and implementation of a theory-guided approach designed to exploit cross-linguistically sharable competencies as resources for promoting FL learning. The volume delineates the processes of (a) identifying cross-linguistically sharable competencies, (b) exploring ways of exploiting sharable competencies as resources in promoting language skills through their purposeful use for content learning, (c) implementing the instructional approach in multiple EFL classrooms, and (d) evaluating the approach by comparing learning outcomes across classrooms. It presents a solid conceptual framework that integrates theories in multiple research domains, including second language acquisition, knowledge acquisition, and language assessment. It also provides detailed descriptions of

framework construction and classroom implementation – the two processes that are integral to course design and development. This title was first published in 2003. Winning significant business on the right terms is an increasingly complex, challenging and time-consuming task, and a successful bid is a vital part of any business offering its services or products to another. This book aims to help you to enhance the probability of success in winning bids at the desired margins and to set-up and run effectively a bid management team. Aimed at two main groups of readers (sales staff managing multi-disciplinary bid teams and project and technical managers who find themselves managing a bid to support a sales campaign) it's a resource for the battle to win new business. Taking an extremely practical approach and using real life examples David Nickson leads the reader through every stage of planning for, producing and delivering a bid: knowing what needs to be done; knowing how to present the information to the prospective client effectively; gaining the writing and editorial skills needed to put a sales case across; identifying the skills that are needed to manage a bid. It also shows how to save time - the most important commodity in any bid as it is always a scarce resource - without affecting quality. This simple-to-use scripted guide to grammar and composition makes successful teaching easy for both parents and teachers. It uses the classical techniques of memorization, copywork, dictation, and narration to develop a child's language ability in the first years of study. The Leveled Texts for First Grade series offers leveled reading materials in the Language Arts, Mathematics, Science, and Social Studies subject areas. This kit features 60 books in total, with five texts for each subject area. Each text includes three reading levels for low-, on-, above-level, and English-language learners, as well as leveled comprehension questions. Each text in the series features the same look, with only the content altering, so students feel confident in their reading level. Saving valuable prep time, this kit ensures teachers will not have to differentiate their classroom reading beforehand. The vibrant images, illustrations, and diagrams will keep students engaged with the grade-level material. The Leveled Texts for First Grade series is aligned with Common Core State Standards, as well as McREL and TESOL/WIDA standards. This study guide includes The Princeton Review Assessment, a full-length diagnostic exam that will predict test takers' approximate scores on both the ACT and the SAT. Four full-length simulated ACT tests are included on CD-ROM. Available in this series: Student Textbook Fourth edition (ISBN 9781510421318) Workbook (ISBN 9781510421325) Study and Revision Guide (ISBN 9781510421349) Language Teaching, Pedagogy and Curriculum Design explores the possibilities of how language teaching research can be used to inform pedagogy. It informs on the realisation among language teachers of the need to be informed on the contributions of research to language learning and to enable them to better reflect on instructional design and practices, and their underlying theories. This book is intended for ESL researchers, teachers and students, especially those who are interested in expanding and developing their knowledge in language teaching not just based on their own experiences in language classrooms but also on current contributions of research on issues in language teaching, pedagogy and curriculum in the region. Richard M. Coe has developed such a "grammar," one which uses a simple graphic instrument to analyze the meaningful relationships between sentences in a passage and to clarify the function of structure in discourse. Working in the tradition of Christensen's generative rhetoric, Coe presents a two-dimensional graphic matrix that effectively analyzes the logical relations between statements by mapping coordinate, subordinate, and superordinate relationships. Coe demonstrates the power of his discourse matrix by applying it to a variety of significant problems, such as how to demonstrate discourse differences between cultures (especially between Chinese and English), how to explain precisely what is "bad" about the structure of passages that do not work, and how best to teach structure. This new view of the structure of passages helps to articulate crucial questions about the relations between form and function, language, thought and culture, cognitive and social processes. Language and Humour in the Media provides new insights into the interface between humour studies and media discourse analysis, connecting two areas of scholarly interest that have not been studied extensively before. The volume adopts a multi-disciplinary approach, concentrating on the various roles humour plays in print and audiovisual media, the forms it takes, the purposes it serves, the butts it targets, the implications it carries and the differences it may assume across cultures. The phenomena described range from conversational humour, canned jokes and wordplay to humour in translation and news satire. The individual studies draw their material for analysis from traditional print and broadcast media, such as magazines, sitcoms,

films and spoof news, as well as electronic and internet-based media, such as emails, listserv messages, live blogs and online news. The volume will be of primary interest to a wide range of researchers in the fields of discourse analysis, sociolinguistics, intercultural studies, pragmatics, communication studies, and rhetoric but it will also appeal to scholars in the areas of media studies, psychology and crosscultural communication. Prosodic development is increasingly recognized as a fundamental stepping stone in first language acquisition. Prosodic sensitivity starts developing very early, with newborns becoming attuned to the prosodic properties of the ambient language, and it continues to develop during childhood until early adolescence. In the last decades, a flourishing literature has reported on the varied set of prosodic skills that children acquire and how they interact with other linguistic and cognitive skills. This book compiles a set of seventeen short review chapters from distinguished experts that have contributed significantly to our knowledge about how prosody develops in first language acquisition. The ultimate aim of the book is to offer a complete state of the art on prosodic development that allows the reader to grasp the literature from an interdisciplinary and critical perspective. This volume will be of interest to scholars and students of psychology, linguistics, cognitive science, speech therapy, and education. Every day, your child encounters language arts in many different situations. The activities in Creative Kids Language Arts make learning language arts fun while also challenging your child to use language arts skills in different subject areas. The activities include stories, games, science experiments, and crafts! In Creative Kids Language Arts, your first grader will:

- *Practice reading comprehension and writing sentences
- *Identify parts of speech and punctuation
- *Play exciting language arts games
- *Read fascinating science passages and complete fun experiments
- *Unscramble and spell words to unlock science facts
- *Create fun stages and puppets and write creative stories

Providing guidance that helps students practice and troubleshoot their exam technique, these books send them into their exam with the confidence to aim for the best grades. - Enables students to avoid common misconceptions and mistakes by highlighting them throughout - Builds students' skills constructing and writing answers as they progress through a range of practice questions - Allows students to mark their own responses and easily identify areas for improvement using the answers in the back of the book - Helps students target their revision and focus on important concepts and skills with key objectives at the beginning of every chapter - Ensures that students maximise their time in the exam by including examiner's tips and suggestions on how to approach the questions

This title has not been through the Cambridge International Examinations endorsement process. First published in 1985, the Handbook for Achieving Gender Equity Through Education quickly established itself as the essential reference work concerning gender equity in education. This new, expanded edition provides a 20-year retrospective of the field, one that has the great advantage of documenting U.S. national data on the gains and losses in the efforts to advance gender equality through policies such as Title IX, the landmark federal law prohibiting sex discrimination in education, equity programs and research. Key features include:

- Expertise – Like its predecessor, over 200 expert authors and reviewers provide accurate, consensus, research-based information on the nature of gender equity challenges and what is needed to meet them at all levels of education.
- Content Area Focus – The analysis of gender equity within specific curriculum areas has been expanded from 6 to 10 chapters including mathematics, science, and engineering.
- Global/Diversity Focus – Global gender equity is addressed in a separate chapter as well as in numerous other chapters. The expanded section on gender equity strategies for diverse populations contains seven chapters on African Americans, Latina/os, Asian and Pacific Island Americans, American Indians, gifted students, students with disabilities, and lesbian, gay, bisexual, and transgender students.
- Action Oriented – All chapters contain practical recommendations for making education activities and outcomes more gender equitable. A final chapter consolidates individual chapter recommendations for educators, policymakers, and researchers to achieve gender equity in and through education.
- New Material – Expanded from 25 to 31 chapters, this new edition includes: *more emphasis on male gender equity and on sexuality issues; *special within population gender equity challenges (race, ability and disability, etc); *coeducation and single sex education; *increased use of rigorous research strategies such as meta-analysis showing more sex similarities and fewer sex differences and of evaluations of implementation programs; *technology and gender equity is now treated in three chapters; *women's and gender studies; *communication skills relating to English, bilingual, and foreign language learning; and *history and implementation of Title IX and other federal and state policies.

Since there is so much misleading information about gender equity and education, this Handbook will be essential for anyone who wants accurate, research-based information on controversial gender equity issues—journalists, policy makers, teachers, Title IX coordinators, equity trainers, women's and gender study faculty, students, and parents. Written by internationally renowned author Stella Cottrell, this is an essential resource for students looking to refine their thinking, reading and writing skills. Stella Cottrell's student-centred approach demystifies critical thinking and breaks down a complex subject into manageable chunks. With clear explanations, relevant examples and plenty of exercises throughout, this book helps students to develop their analytical reasoning skills and apply them to a range of tasks including reading, note-making and writing. This text will turn even the most hesitant student into a proficient critical thinker. This is an ideal companion for students of study skills, humanities, social sciences, business and arts programmes, where assessment includes essay and report writing. It is suitable for students of all levels. New to this

Edition: - Brand new chapter on critical thinking and employability - Includes a wider range of examples to highlight the variety of contexts in which critical thinking can be used - Coverage of both academic and professional forms of critical writing For decades, bilingualism has resisted definition. If bilingualism is defined as habitual, fluent, correct and accent-free use of two languages, few individuals would qualify as bilinguals. A more viable approach may be to concede that 'bilingual' can be seen instead as a range of points on a continuum that allows for differences. The psychological study of bilingualism encompasses a wide range of phenomena including the organization and representation of the grammar, the perception and production of language mixing, cerebral lateralization of language functions, and patterns of recovery of aphasic patients. This book collects together an international array of researchers in experimental psychology, linguistics and neuropsychology, who bring their expertise to bear on the critical issues that are raised by the bilingual phenomena. Proficiency in Listening and Reading Comprehension Hidayet TUNCAY The book is intended to help pre-intermediate (CEFR-B1), intermediate (CEFR-B2), upper-intermediate (CEFR-C1) and advanced (CEFR-C2) learners of English who are preparing for proficiency examinations, such as TOEFL, KPDS (Language Proficiency test for Government Employees), FCE (First Certificate in English), CAE (Certificate in Advanced English), University Preparatory School Exemption Tests and mainly the Turkish Army Personnel who will take Genel Dil and ECL (English Comprehension Level). In chapter one, Advanced Reference Grammar Practice covering 10 major sections of the English Language grammar are presented with specific examples and supported with tests and exercises. In the end of this chapter a GATE (Grammar Achievement Test in English) test is given. Chapter two contains a listening part that covers three main sections: intermediate, upper-intermediate and advanced. The passages contain nearly 30 different topics ranging from economy to military and are made up of 42 comprehension passages and 15 paragraphs. To ensure the learners' listening comprehension, almost 300 questions are given. All the passages in this chapter were professionally recorded by 2 native speakers of English. In chapter three, specifically chosen reading comprehension passages are given in four separate sections: intermediate (B1), upper-intermediate (B2), advanced (C1) and authentic (C2). The chapter has been reorganized and new passages are included within 67 passages in almost 30 different topics. Chapter four, Word practice covers academic, scientific, social and TOEFL, Genel Dil and ECL vocabulary. Various exercises and tests are given. Most confused and misused words are covered as well. Chapter five is the testing section which includes practice tests such as 3 English Proficiency Practice Tests with listening sections, 4 vocabulary and reading comprehension based English Screening Tests and 1 Proficiency Practice Test for general English Proficiency. All tests cover 800 questions based on listening, reading, structure and vocabulary related to both technical and social subjects. The book covers various exercises such as 403 comprehensive exercises in the grammar chapter with a complete test of GATE-Grammar Achievement Test in English. 254 open end and multiple choice exercises are in listening comprehension. Reading Comprehension chapter covers 746 comprehensive exercises to improve learners' reading comprehension. In Word Practice chapter, 198 exercises are given to practice various academic vocabularies which learners may encounter while practicing language for various exams. Migration fundamentally shapes the processes of national belonging and socioeconomic mobility in Mexico—even for people who never migrate or who return home permanently. Discourse about migrants, both at the governmental level and among ordinary Mexicans as they envision their own or others' lives in "El Norte," generates generic images of migrants that range from hardworking family people to dangerous lawbreakers. These imagined lives have real consequences, however, because they help to determine who can claim the resources that facilitate economic mobility, which range from state-sponsored development programs to income earned in the North. Words of Passage is the first full-length ethnography that examines the impact of migration from the perspective of people whose lives are affected by migration, but who do not themselves migrate. Hilary Parsons Dick situates her study in the small industrial city of Uriangato, in the state of Guanajuato. She analyzes the discourse that circulates in the community, from state-level pronouncements about what makes a "proper" Mexican to working-class people's talk about migration. Dick shows how this migration discourse reflects upon and orders social worlds long before—and even without—actual movements beyond Mexico. As she listens to men and women trying to position themselves within the migration discourse and claim their rights as "proper" Mexicans, she demonstrates that migration is not the result of the failure of the Mexican state but rather an essential part of nation-state building.
