Sabina Kane doesn't have the best track record when it comes to family. After all, her own grandmother, leader of the vampire race, wants her dead. So when she arrives in New York to meet her mage relatives, the reunion puts the fun in dysfunctional. Not only is mage culture completely bizarre, but everyone seems to think she's some kind of 'Chosen' who'll unite the dark races. Sabina doesn't care who chose her, she's not into destiny. But the mages aren't Sabina's only problem. In New York's Black Light District, she has run-ins with fighting demons, hostile werewolves and an opportunistic old flame. Sabina thought she'd take a bite out of the Big Apple, but it looks like it wants to bite back. To Pioneer the Oceans To Live aboard the Sea To Weather the Storm To Reward Yourself To Get to Know Your Family To Live a Different Kind of Life No Matter What you Earn To Join the Westsail Family Powerful words that brought a new type of cruising sailboat to market in the early 1970s. For years it had been understood that sailboats were more an emotional purchase than a rational one. Yet most companies advertised facts and specifications, presuming that sailboat buyers were knowledgeable enough to translate the specifications into which boat fulfilled their dreams. Westsail made no such presumption and became the first company to put the facts about their boats and the emotional appeal of sailing together in sweet harmony. Boy, did they make a success of the concept. Over 1100 cruising sailboats were delivered in less than ten years. Until recently, Iranian literature has overwhelmingly been the domain of men. But the new hybrid culture of diaspora Iranians has produced a prolific literature by women that reflects a unique perspective and voice. Let Me Tell You Where I've Been is an extensive collection of poetry, fiction, and nonfiction by women whose lives have been shaped and influenced by Iran's recent history, exile, immigration and the formation of new cultural identities in the United States and Europe. These writings represent an emerging and multi-cultural female sensibility. Unlike many flat media portrayals of Iranian women—as veiled, silenced—these writers offer a complex literary view of Iranian culture and its influences. These writers interrogate, challenge, and re-define notions of home and language and their work offers readers an experience of Iranian diaspora culture. Featuring over one hundred selections (two-thirds of which have never been published before) by more than fifty contributors—including such well-known writers as Gelareh Asayesh, Tara Bahrampour, Firoozeh Dumas, Roya Hakakian and Mimi Khalvati--the collection represents a substantial diversity of voices in this multicultural community. Divided into six sections, the book's themes of exile, family, culture resistance, and love, create a rich and textured view of the Iranian diaspora. The poems, short stories, and essays are suggestive of an important conversation about Iran, Iranian culture, the Persian and English languages, and the dual identities of many of its authors. This powerful collection is a tribute to the wisdom, insight, and sensitivity of women attempting to invent and articulate a literature of in-betweenness. A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—“In the future, everyone will be world-famous for 15 minutes.” Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist. This book presents a digest of what The Urantia Book says-the gist of it, the main outlines of the story. As such The Urantia Revelation: The Structure and Meaning of the Universe Explained will serve as an introduction and guide to The Urantia Book, or as simplified and accessible substitute for those wishing to know what was revealed in the fifth epochal revelation on Planet Earth. There is hardly anything more interesting. Painting has often been declared dead since the 1960s and yet it refuses to die. Even the status and continued legitimacy of the medium has been repeatedly placed in question. As such, painting has had to continually redefine its own parameters and re-negotiate for itself a critical position within a broader, more discursive set of discourses. Taking the American Clement Greenberg's 'Modernist Painting' as a point of departure, After Modernist Painting will be both a historical survey and a critical re-evaluation of the contested and contingent nature of the medium of painting over the last 50 years. Presenting the first critical account of painting, rather than art generally, this book provides a timely exploration of what has remained a persistent and protean medium. Craig Staff focuses on certain developments including the relationship of painting to Conceptual Art and Minimalism, the pronouncement of paintings alleged death, its response to Installation Art's foregrounding of site, how it was able to interpret ideas around appropriation, simulation and hybridity and how today painting can be understood as both imaging and imagining the digital. After Modernist Painting is an invaluable resource for those seeking to understand the themes and issues that have pertained to painting within the context of postmodernism and contemporary artistic practice. Whose wheels are these? Read the rhyming text and look at the bright pictures to work it out. Then lift the giant flaps and reveal the different vehicles to see if you were right! Take a trip through the history of the world, planet and universe! Totally unique, this amazing timeline stickerbook has 114 stickers that help bring the giant story to life. Beautifully-illustrated and hugely engaging, the 5.5-foot long timeline features captioned white silhouettes on which to place your stickers and build the big picture of the moments, people and events that have shaped the story of mankind. Described by the Telegraph as being "truly impressive", the stickerbook of Big History gives any child (or adult!) the framework and structure they need to make sense of how humankind has progressed. Unfold the history of the universe--from the big bang to the present day! Created in association with the American Museum of Natural History. “In addition to scaring the daylights out of us, The Diviner’s Tale stands up for the offbeat and unconventional in human nature” (The Boston Globe). Cassandra Brooks is a diviner, what used to be called a water-witch. Hired by a developer to dowse some land in upstate New York, she is walking a lonely forested valley one spring morning when she comes upon the shocking vision of a young girl hanged from a tree. When she returns with authorities to the site, the body has vanished, leaving in question Cassandra’s credibility, if not her sanity. The next day, during a return visit with the sheriff to have another look, a dazed, mute missing girl emerges from the woods—alive, and the very picture of Cassandra’s hanged girl. What follows is the narrative of ever-deepening and increasingly bizarre divinations that will lead this gifted young woman, the struggling single mother of twin boys, hurtling toward a past she’d long since thought was behind her. The Diviner’s Tale is at once a journey of self-discovery and an unorthodox murder mystery, a tale of the fantastic and a family chronicle told by an otherwise ordinary woman who is about to be locked in a mortal chess match with a real-life killer who has haunted her since before she can remember. “[A] splendidly written mystery . . . A compelling story. Grade: A.” —The Plain Dealer “An astonishing writer.” —Joyce Carol Oates, New York Times–bestselling author of Double Delight “Beautifully written, tight as a tripwire. The Diviner’s Tale isn’t quite like any ghost story I’ve read before.” —Boing Boing “Morrow quietly drops clues as he guides you deeper into the mystery of the dead girl—and into Cass’s own mind.” —The New York Times This notebook contains blank wide ruled line paper which makes it great as a: Gratitude Journal Mindfulness Journal Mood Journal Prayer Journal Poetry or Writing Journal Travel Notebook Daily Planner Dream Journal Yoga, Fitness, Weight Loss Journal Recipe, Food Journal Password Log Book Log Book Diary Specifications: Paper: White Layout: Lined Dimensions:6x9 inch Premium Design High quality 180 pages Hit the road and experience the wonders of RVing with these useful tips and tricks to make RV life easier, more organized, more efficient, and fun! Food at Sea: Shipboard Cuisine from Ancient to Modern Times traces the preservation, preparation, and consumption of food at sea, over a period of several thousand years, and in a variety of cultures. The book traces the development of cooking aboard in ancient and medieval times, through the development of seafaring traditions of storing and preparing food on the world’s seas and oceans. Following a largely chronological format, Simon Spalding shows how the raw materials, cooking and eating equipments, and methods of preparation of seafarers have both reflected the shoreside practices of their cultures, and differed from them. The economies of whole countries have developed around foods that could survive long trips by sea, and new technologies have evolved to expand the available food choices at sea. Changes in ship construction and propulsion have compelled changes in food at sea, and Spalding’s book explores these changes in cargo ships, passenger ships, warships, and other types over the centuries in fascinating depth of detail. Selected passages from songs and poems, quotes from seafarers famous and obscure, and new insights into culinary history all add spice to the tale. Gabriel Granö's career as a geographer spanned the first half of the twentieth century. In the course of his explorations in Central Asia (where his father had served as Lutheran pastor to Siberia's Finnish colony) Granö initially specialized in geomorphology, a highly fashionable branch of science at that time, and one regarded by many as the true calling of the geographer. It was not long, however, before theoretical themes began to emerge in Granö's work. In the 1920s he began to develop a highly original methodology of landscape geography, based on the idea that the real object of geographical research should be the environment as perceived by the senses and regions constructed on the basis of these perceptions. It was from this starting point that he created the doctrine he called "pure geography." First published in German (1929) and then in his native Finnish (1930), Granö's Pure Geography is regarded by many geographers as one of the classic works in the field. Long out of print, this widely acclaimed classic is now available for the first time in English translation. A look at the early years of our sixteenth president. A illustrated biography of George Washington, especially his youth, which emphasizes his determination and his contact with the wilderness of the frontier as major influences on his life. This eBook edition has been formatted to the highest digital standards and adjusted for readability on all devices. Richard Shackford is an extraordinary young man, estranged from his wealthy family. He must take care of himself and manages to find an employment at a New England marble quarry. By hard work and dedication he works his way up through the ranks to become assistant to the owner. Along with the business success, he also falls in love with the daughter of his boss and his life seems to be perfect. However, Shackford's wealthy cousin is found murdered and things start to turn for the worse. Cousin's will, in which he is naming Shackford as the heir to the fortune, is found at scene of the murder and it directs suspicion towards him. Some other clues also point out to him and it takes a true detective to solve the mystery. In What on Earth Happened?, Christopher Lloyd tells our story from the very beginning of time to the present day, taking giant narrative leaps across millennia and continents. Along the way, he explains exactly how Muslim conquest gave Spain its paella, how the Earth's collision with another young planet created the moon, how dragonflies the size of seagulls emerged out of the prehistoric waters, and how the Big Bang can be detected in your television. Accessible and endlessly entertaining, this massive book draws on disciplines as wide-ranging as astrophysics and anthropology and will appeal to experts, amateur enthusiasts and the simply curious alike. Completed by 250 colourful photographs, maps, historic paintings, engravings and specially commissioned illustrations, What on Earth Happened? takes an entertaining and informed sideways look at the last 13.7 billion years in the life of our universe. For more than five thousand years, this great scripture has shown millions in the East how to fill their lives with serenity and love. In these pages, Jack Hawley brings these ancient secrets to Western seekers in a beautiful prose version that makes the story of the Gita clear and exciting, and makes its truths understandable and easy to apply to our busy lives. The Gita is a universal love song sung by God to His friend man. It can't be confined by any creed. It is a statement of the truths at the core of what we all already believe, only it makes those truths clearer, so they become immediately useful in our daily lives. These truths are for our hearts, not just our heads. The Gita is more than just a book, more than mere words or concepts. There is an accumulated potency in it. To read the Gita is to be inspired in the true sense of the term: to be "inspired," to inhale the ancient and ever-new breath of spiritual energy. This new editoin has been updated in line with the changes to the motorcycle theory test revision bank. The theory test questions now have just one correct option out of four, making the questions easier to understand and reflecting the real test. The blessing of the information age is that doctors, scientists, and researchers of all kinds have more information at their disposal than they have ever had before. The curse of the information age is that all this generated data has led to overload, the result being that data now serves to confuse almost as much as it clarifies. One method for dealing with this overwhelming amount of data is to display it in one form or another, and the most popular way of displaying data in recent years has been through visualization techniques, e.g., graphs, bar diagrams, time series plots, etc. These techniques have been extremely useful. However, they have their limitations, and researchers are now exploring alternative methods. One of the most promising types of new methods is the subject of this important volume.We frequently fail to appreciate how adept people are at interpreting sounds, especially very subtle ones. Recognizing the strength of the auditory sense, researchers have been developing tools that promise to be useful in real-time applications, from the monitoring of hospital operating rooms to the stress-filled task of air traffic control. Now, sonification (the display of data through sound) provides new tools for recognizing patterns and analyzing data, extending the process of discovery in such diverse fields as parallel computer programming, geophysics, financial market analysis, and computational fluid dynamics. The Caldecott-winning team that brought us So You Want To Be President? turn their humorous eye and voice to inventors and their inventions You've probably heard of Leonardo da Vinci. He is dead famous for painting the Mona Lisa and designing the first-ever flying machine. But have heard that Leonardo spent ten years making a seven-metre tall horse, thought pink was the coolest colour for clothes and loved to play practical jokes? The Ex Factor by Nancy Warren Wedding planner Karen Petersham usually loves weddings. But when her newest client brings her best man to a consultation, Karen finds out it's her sexy ex-husband, Dexter Crane and that the chemistry is still there! But there are rules when engaging in ex-sex do not get romantically involved, remember why it ended in the first place, and get out before you fall in loveagain! Touch And Go by Michelle Rowen Carrie Stanfield is in the Bahamas on assignment with the hottest guy ever! The chemistry between them is more volatile than the tropical storm that strands them on a deserted island. So why the heck won't Patrick McKay touch her already? Patrick would love to get his hands all over Carrie's sweet body. But in the effort of healing a spinal injury, he's been messing around with a magic charm. Unfortunately, this makes touching another person very hard. But not touching Carrie is making him even harder Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. Training and Racing with a Power Meter makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form Introduces fatigue profiling, a new testing method to pinpoint weaknesses Includes two training plans to raise functional threshold power and time peaks for race day Offers 75 power-based workouts tuned for specific training goals This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. Training and Racing with a Power Meter, will continue to be the definitive guide to the most important training tool ever developed for endurance sports.
